The Class of 2002 Four-Year Longitudinal Report and 2001-2002 Event Dropout Rates

April 2003
Assessment and Accountability

ACKNOWLEDGMENTS

This study is a report of the New York City Department of Education, Division of Assessment and Accountability. Dr. Susan R. Waddington conducted the data analysis on which this report is based under the supervision of Dr. Jan Rosenblum, Manager of the Data Management and Accountability Unit.

Additional copies of this report are available by writing to:

THE CLASS OF 2002: FOUR-YEAR LONGITUDINAL GRADUATION AND DROPOUT REPORT AND 2001-2002 EVENT DROPOUT RATES

KEY FINDINGS

Overall, just over one-half (50.8 percent) of students in the Class of 2002 graduated, and just over one-fifth (20.3 percent) of the class dropped out at the end of the four years. The remaining 30 percent were enrolled for a fifth-year of high school. The graduation, dropout and still-enrolled rates for the Class of 2002 were comparable to those of the Class of 2001. Further, the percentage of graduates awarded Regents-Endorsed Diplomas and Regents-Endorsed Diplomas with Honors has been increasing for graduating cohorts since 1996 and did so again for the Class of 2002.

BACKGROUND

This report presents the progress toward school completion of students who entered the ninth grade in fall of 1998 and were scheduled to graduate on time in spring 2002 after four years of high school. The Class of 2002 is the seventeenth class for which the Division of Assessment and Accountability (DAA) has conducted a four-year longitudinal study. The report presents outcomes for the class as a whole, as well as outcomes for specific groups of students categorized by gender, native language, race/ethnicity, and immigrant status. Four-year outcome data for the individual high schools are presented in Appendix A. To track trends across classes, comparisons of four-year outcome data for the Classes of 2000, 2001 and 2002 are presented in Appendix B, Event dropout rates appear in Appendix C.

METHODOLOGY

Longitudinal Cohorts

The study follows two student cohorts. One is comprised of students in general education classes, including students receiving services in resource rooms, related services and consultant teacher services. This cohort is referred to as the Class of 2002. The other is comprised of students in self-contained special education classes. It includes District 75, the citywide special education district which consists of schools that primarily serve students with severe disabling conditions. This cohort is referred to as the Special Education Class of 2002.

Students were assigned to the Class of 2002 based on the year in which they entered grades 9 through 12. More than nine in ten (92.9 percent) of the students in the Class of 2002 joined the cohort as entering ninth-graders during the 1998-99 school year and most had been in the New York City public schools in lower grades. Some entered our school system during grade 9. The remainder transferred into the New York

City public schools during high school and became part of the cohort as tenth graders in 1999-00, as eleventh graders in 2000-01, or as twelfth graders in 2001-2002. All of these students would have completed the traditional four-year high school sequence by spring or summer 2002. Students who were discharged to other school systems with confirmation of enrollment were omitted from the cohort.

Because self-contained special education classes are ungraded, students were assigned to the separate Special Education Class of 2002 cohort based on their age and enrollment in special education programs. Students were included in the Special Education Class of 2002 if they were 14 years old during the 1998-99 school year and were in a self-contained special education class in a Community School District school, high school, or a citywide special education program (District 75). Students were not added to the Special Education Class of 2002 after the initial year because of the ungraded nature of their classes.

The primary focus of this report is on the number and percent of students graduating on time and dropping out of the New York City public schools. Related to this focus is the task of determining the status of all of the students in the class at the time the students were expected to graduate. Each student in the study group is determined to be in one of four possible categories based on his or her status at the end of the school year. Dropouts are students who have left the school system without enrolling in another education program that leads either to a high school diploma or prepares the student for the Test of General Educational Development leading to a general equivalency diploma (GED). Graduates are students who have received a high school diploma, GED, or special education certificate by June or August 2002. Discharges are students who left the school system primarily to enroll in another educational program or setting. Students who aged out of the school system, i.e., reached the age of 21, and students who died prior to completing high school, are also counted in this category. Still-enrolled students were still on register and scheduled to continue into a fifth year of high school in fall 2002.

Event Dropout Rate

In addition to the Class of 2002 longitudinal data, this report also presents event dropout rates. The event dropout rate represents the number of students who dropped out of high school during the 2001-2002 school year regardless of when they entered the school system. Students are counted as dropouts if they left school by the end of the 2001-2002 school year without re-enrolling in another educational setting leading to a high school diploma or GED. Only students who were first-time dropouts during the 2001-2002 school year are counted.

FINDINGS

Characteristics of the Class of 2002

During the dates covered by the study (the 1998-99 through the 2001-2002 school years), the New York City public schools served 79,351 students in the cohort (see Table 1). This included the base population of 72,822

Table 1

Grade and Year of Admission to, or Transfer from, the Class of 2002

<i>Grade and Year</i>	<i>Base Population</i>	<i>Admissions</i>	<i>(Transfers and Discharges*)</i>	<i>Total Students in Class</i>
<i>9th Grade, 1998-1999</i>	72,822**		3,159	69,663
<i>10th Grade, 1999-2000</i>		3,826	4,015	69,474
<i>11th Grade, 2000-2001</i>		1,306	4,242	66,538
<i>12th Grade, 2001-2002</i>		397	3,475	63,460
<i>Total</i>	<i>72,822</i>	<i>5,529</i>	<i>14,891</i>	<i>63,460***</i>

*Number of students discharged, primarily to other school systems, during the indicated school year.

**Number of students on register in grade 9 who were not held over from the previous school year.
Includes students who were admitted to the school system during the 1998-99 school year.

***This is the student cohort used for calculating outcomes.

students who entered 9th grade in 1998-99 and 5,529 students admitted to the class in subsequent years. Over the four-year period, 14,891 (19.0 percent) were discharged prior to the expected graduation date of spring 2002. Almost all of these left the city and entered another school system. After adding admissions in grades 10, 11, and 12 and removing students who transferred to other school systems, there were 63,460 students in the Class of 2002.

The 63,460 students in the Class of 2002 had the following characteristics:

- The Class of 2002 contained a slightly higher proportion of females than males (51.2 percent females and 48.8 percent males).
- The ethnic composition of the cohort was 35.7 percent African American, 33.0 percent Hispanic, 16.9 percent White, and 14.1 percent Asian. Less than one percent of the students were American Indian/Alaskan Natives.
- Of the 63,460 students, 13.2 percent (8,361 students) were still English language learners (ELLs), students entitled to bilingual or English-as-a-second-language (ESL) services at the end of their high school careers. An additional 26.6 percent (16,905 students) were former ELLs, students who were at one time ELLs but who scored above the 40th percentile on the Language Assessment Battery before they left high school.
- Nearly a quarter of the cohort were recent immigrants to the United States, 22.0 percent (13,956). These students came from more than 140 different countries. Of these recent immigrants, 34.1 percent (4,761 students) entered the country in either grade 7 or grade 8. The remainder, 65.9 percent (9,195 students), entered the country sometime during or after grade 9.

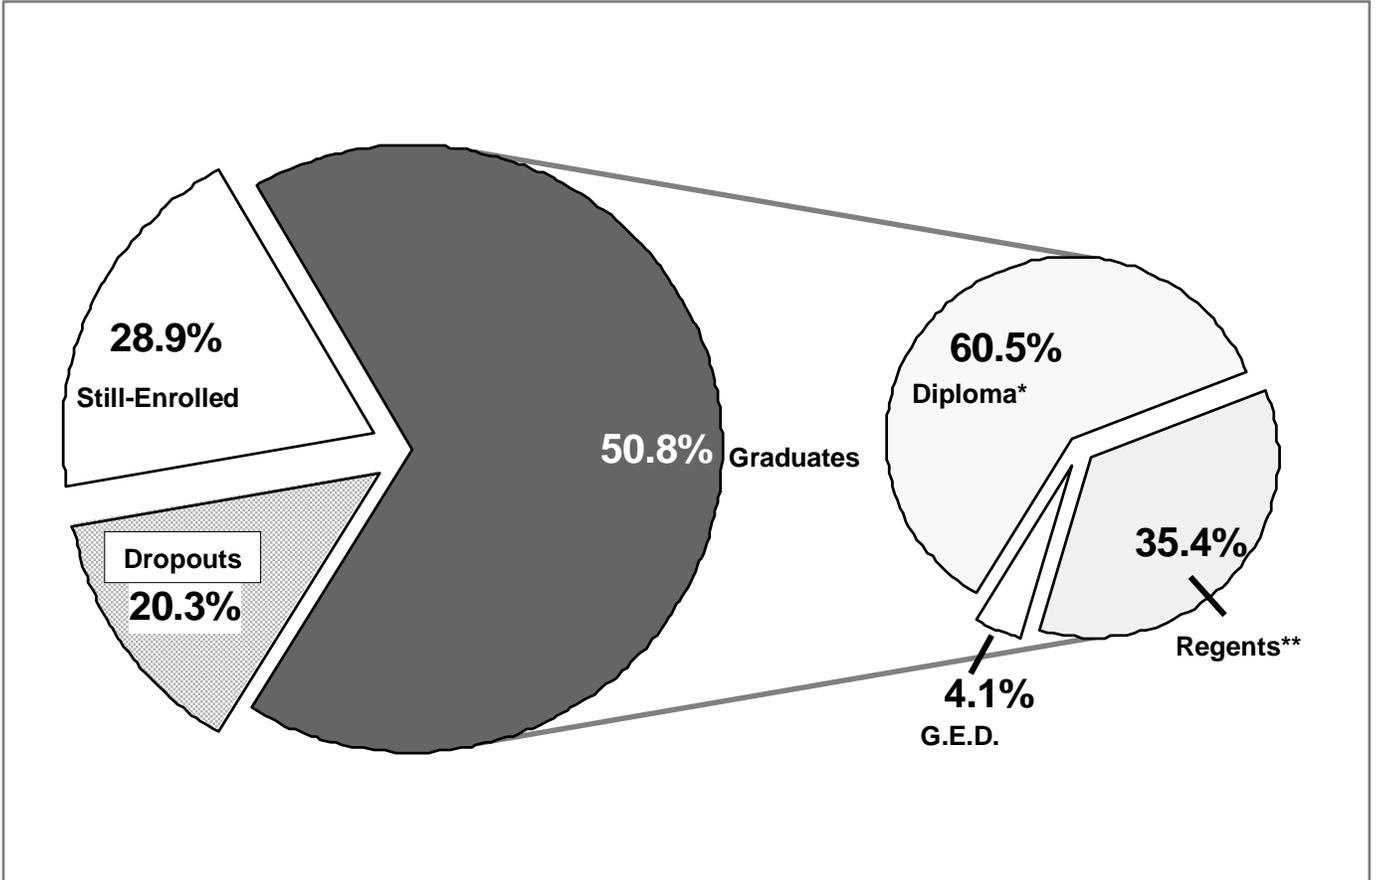

General outcomes for the Class of 2002

The overall results for the Class of 2002 are comparable to the Class of 2001. Both the four-year graduation rate and the four-year dropout rate decreased slightly. Correspondingly, the percentage of students who remained in high school for a fifth year increased slightly. The following are the specific outcomes for the Class of 2002 (see Figure 1):

- The four-year dropout rate for the Class of 2002 was 20.3 percent. This is 0.1 of a percentage point lower than the comparable rate for the Class of 2001 (20.4 percent).

Figure 1

**Outcomes for the Class of 2002
(N=63,460)**

* Includes local diplomas, special education diplomas, and certificates

** Includes Regents-Endorsed and Regents-Endorsed with Honors diplomas.

- The four-year graduation rate for the Class of 2002 was 50.8 percent. This is 0.2 of a percentage point lower than the comparable rate for the Class of 2001 (51.0 percent).
- A total of 28.9 percent of the Class of 2002 was still enrolled in school and scheduled to enter a fifth year of high school in September 2002. This was an increase of 0.3 of a percentage point over the comparable rate for the Class of 2001 (28.6 percent).
- Table 2 presents the status of the Class of 2002 for each of the four years of the study. It indicates that of the 12,885 students who dropped out, 1,393 did so after two years in high school, 3,817 did so after three years in high school, and 7,447 did so after four years.
- Table 3 presents the types of diplomas earned by Class of 2002 graduates. The percentage of graduates awarded Regents-Endorsed Diplomas and Regents-Endorsed Diplomas with Honors was 35.4 percent. This continues an upward trend since 1996. This is an important finding in light of the new state graduation regulations that required the Class of 2002 to pass Regents examinations in English, mathematics, U.S. History and Government and Global History to earn a diploma. (See Appendix D for diploma requirements.)

Outcomes by student groups

Outcomes by gender

- A substantially greater percentage of females (55.9) than males (45.5) graduated on time (see Figure 2). The dropout rate of males was 5.2 percentage points higher than that of females (23.0 percent compared to 17.8 percent). Also, a higher percentage of males (31.5 percent) were still enrolled and entering a fifth year of high school compared to females (26.3 percent). These findings are similar to the Class of 2001.

Outcomes by age for grade on entry to high school

- Many students who entered the cohort in grade 9 were already over-age for grade. This may be due to previous retention in our schools or because the students were over-age when they entered the New York City public schools. Figure 3 indicates the percentage of students in each outcome category who were either over-age or the expected age for grade when they entered high school. As the results show, 82.4 percent of the students who graduated in four years were the expected age for grade when they entered grade 9. In contrast, 41.6 percent of the students who became dropouts were the expected age when they entered Grade 9, and 58.4 percent were already over-age for the grade. The percentages for the still-enrolled students are more similar to those for the graduates than the

<i>GED</i>	8.1	8.5	8.1	4.1 ^a
<i>Total</i>	<i>100.0</i>	<i>100.0</i>	<i>100.0</i>	<i>100.0</i>

* These students were in general education classes with special education resource-room services.

^a The reduction in the percentage of students in the Class of 2002 reported as earning a GED is due, at least in part, to the fact that the NY State Education Department had not released information indicating the number of NYC public school students in the Class of 2002 who had passed the GED exam at the time that this report was prepared.

Figure 2

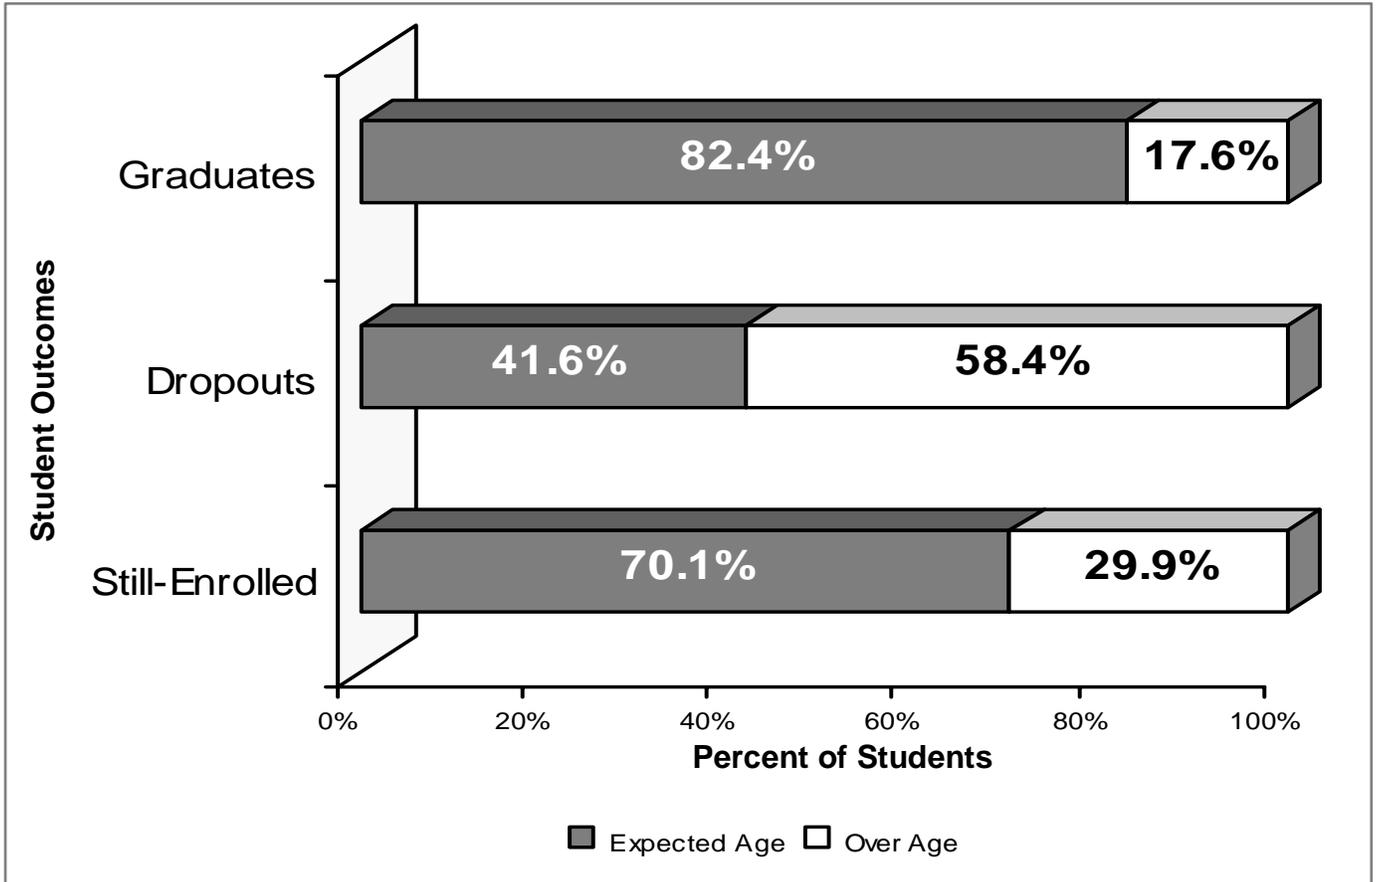

Four-Year Outcomes for the Class of 2002, by Gender
Data include August 2002 Graduates and DVR Updates

Note: Data do **not** include students who were discharged from the school system.

Figure 3

Age for Grade on Entry into High School
by Student Outcome for the Class of 2002

Note: Results include August 2002 Graduates and D.V.R. updates.

dropouts. Since the age-for-grade factor has a strong relationship with school completion, it is expected that a high percentage of the still-enrolled students will earn a degree in the fifth, sixth, and seventh years of high school.

Outcomes by ethnic background

- Figure 4 reports the four-year school-completion outcomes for each ethnic/racial group. As observed for earlier cohorts, White and Asian students had the highest four-year graduation rates (70.5 percent and 66.9 percent respectively) and the lowest dropout rates (12.2 percent for both groups). Conversely, Hispanic students had the lowest four-year graduation rate (41.1 percent) and the highest dropout rate (26.0 percent). The graduation rate for African American students was 44.4 percent with a dropout rate of 22.1 percent. For American Indians/Alaskan Native students, the graduation rate was 41.7 percent and the dropout rate was 23.2 percent. Still enrolled rates were 17.2, 21.0, 32.9, 33.4, and 35.1 percent for White, Asian, Hispanic, African American and American Indians/Alaskan Native students, respectively. Table 4 provides comparisons by ethnic group for the Classes of 1999 through 2002.
- For the Class of 2002, the dropout rate increased for all ethnic/racial groups except for African American students which decreased 0.5 of a percentage point. The largest increase was for American Indian/Alaskan Native students, 5.8 percentage points. (Because there are few American Indian/Alaskan Native students system-wide, this group experiences greater year-to-year fluctuations in graduation, dropout, and enrollment rates than other ethnic/racial groups.) The increases for Hispanic, White, and Asian students were each less than one percentage point. The graduation rate for African American students was comparable to that of the previous class. American Indian/Alaskan Native students' graduation rate declined 3.4 percentage points, and Asian, Hispanic, and White students' graduation rates declined 1.8, .2, and 1.1 percentage points, respectively. In addition the percentages of students who were still enrolled for a fifth year of high school increased for Asian, African American, and White students, while for American Indian/Alaskan Native students fifth year enrollment rate decreased 2.3 percentage points from the Class of 2001. Hispanic students' fifth year enrollment rate remained the same as in 2001.

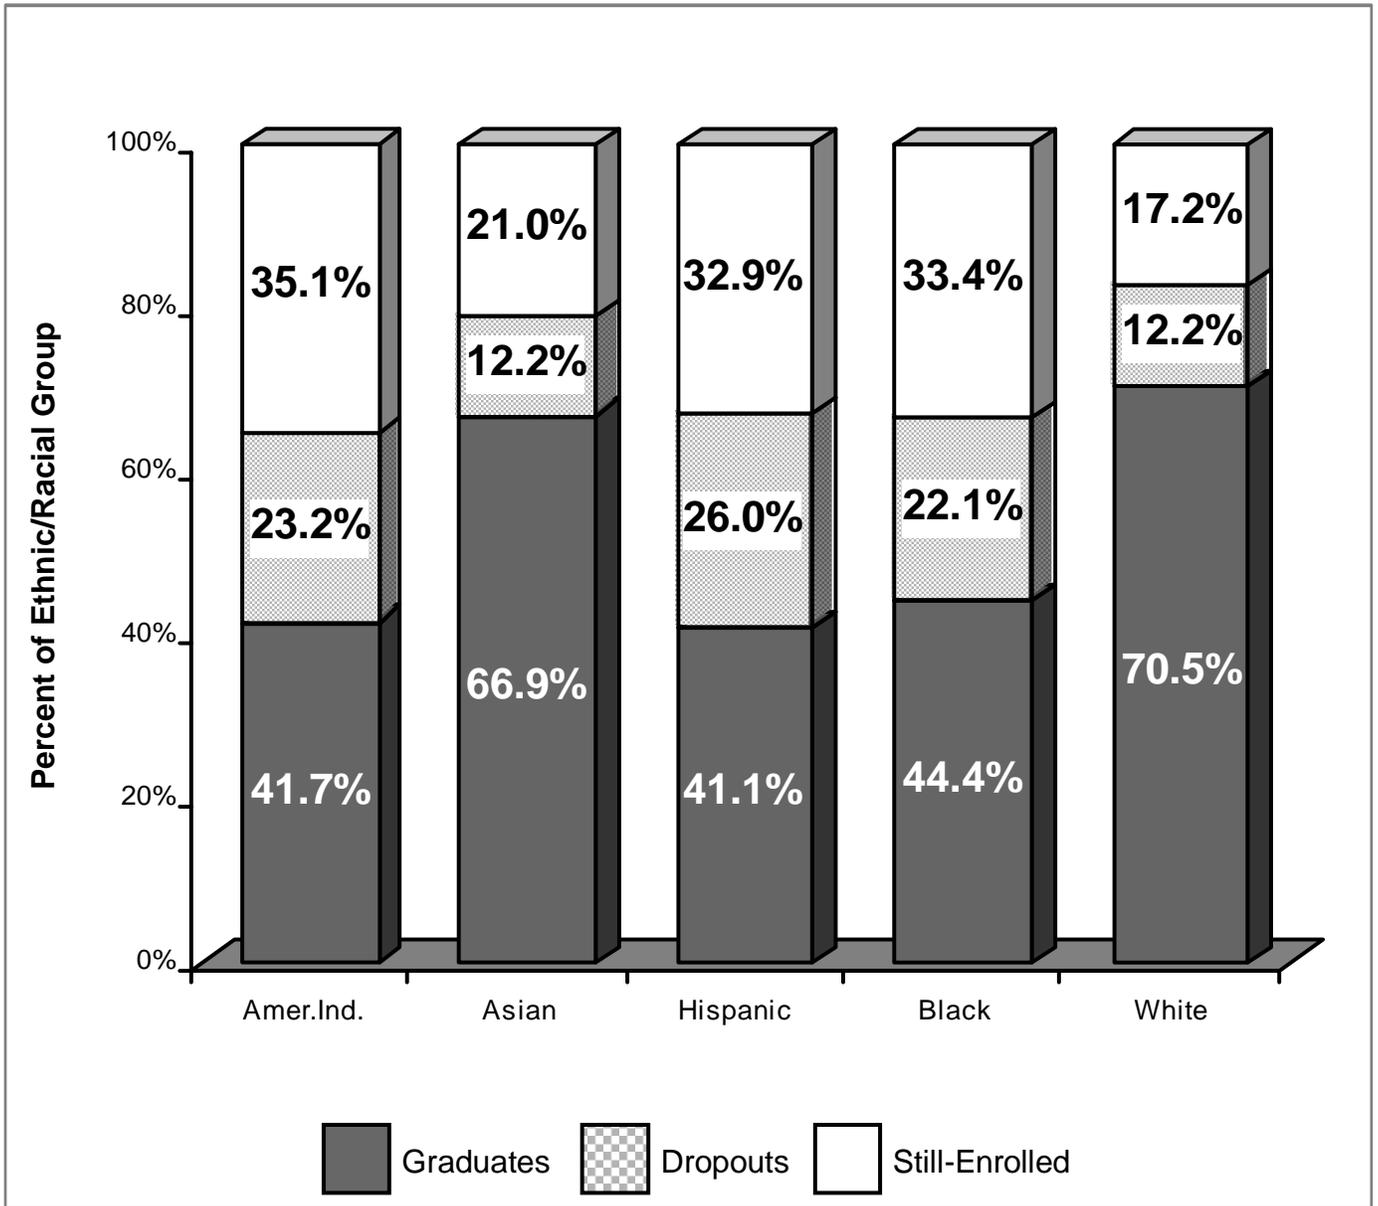

Outcomes for English Language Learners

- As reported earlier in the report, 8,361 (13.2 percent) of the students in the Class of 2002 were still ELLs at the end of four years of high school, and 16,905 (26.6) were former ELLs. (Former ELLs are students who tested out of a bilingual or free-standing English as a second language program.) These students spent at least part of their high school careers in bilingual or freestanding English-as-a-second-language programs.

Figure 4

Four-Year Outcomes for Ethnic/Racial Populations
in the Class of 2002, including August, 2002 Graduates and DVR Updates

Data Include August 2002 Graduates and DVR Updates

Note: Percentages may not add to 100% due to rounding.

Table 4

**Four-Year Outcomes for Ethnic/Racial Populations
and the Combined Population in the Classes of
1999 to 2002**

<i>Ethnic/Racial Groups</i>	<i>Percentage of:</i>		
	<i>Graduates</i>	<i>Dropouts</i>	<i>Still Enrolled</i>
<i>American Indian</i>			
1999	45.0	18.3	36.7
2000	48.2	23.0	28.8
2001	45.1	17.4	37.4
2002	41.7	23.2	35.1
<i>Asian</i>			
1999	67.5	10.0	22.5
2000	67.4	11.1	21.5
2001	68.7	11.3	20.0
2002	66.9	12.2	21.0
<i>Hispanic</i>			
1999	40.2	22.4	37.5
2000	39.4	25.0	35.6
2001	41.3	25.9	32.9
2002	41.1	26.0	32.9
<i>Black</i>			
1999	44.4	18.6	37.0
2000	44.4	20.4	35.2
2001	44.3	22.6	33.1
2002	44.4	22.1	33.4
<i>White</i>			
1999	71.3	10.4	18.4
2000	71.3	11.3	17.4
2001	71.6	11.9	16.4
2002	70.5	12.2	17.2
<i>Combined Student Population</i>			
1999	50.1	17.5	32.4
2000	49.9	19.3	30.8
2001	51.0	20.4	28.6
2002	50.8	20.3	28.9

- Overall, the school completion outcomes of current ELL students fall short of those for non-ELL students (see Figure 5). Current ELLs had lower four-year graduation rates and higher dropout rates than the non-ELL students. However, ELL students were still enrolled at a higher rate than the non-ELL students, suggesting that the gap in school completion outcomes between ELL and non-ELL students may be reduced when the final statistics for the Class of 2002 are reported in the three-year follow-up study. This reduction in disparity has been observed consistently in three-year follow-up studies, including that for the Class of 1999.

Outcomes for Recent immigrants

- In the Class of 2002, 22.0 percent (or 13,956 students) were identified as recent immigrants. Students who are recent immigrants can be divided into two groups. The first group, which represents 34.1 percent of recent immigrants, is comprised of students who first entered New York City public middle schools in grade 7 or 8. The second group, representing 65.9 percent of recent immigrants, entered the Class of 2002 in grade 9 or after. It is important to note that although many immigrants are ELL students, ELLs may be either immigrants or non-immigrants.
- The outcomes for the students in the Class of 2002 by immigrant status are reported in Figure 6. The results indicate that as a group, immigrants come to our schools relatively prepared to succeed in high school. Students who were recent immigrants to our schools in grades 7 and 8 had a dropout rate of 16.8 percent, lower than the 20.3 percent dropout rate for all students citywide. The dropout rate for students who immigrated to the country during high school was 20.7 percent, and 20.6 percent for non-immigrants. The graduation rate for students who immigrated in grade 7 and 8 (52.9 percent) was higher than that of students who were immigrants when they entered the Class of 2002 in grades 9-12 (49.3 percent), and higher than that of non-immigrant students (50.9 percent).

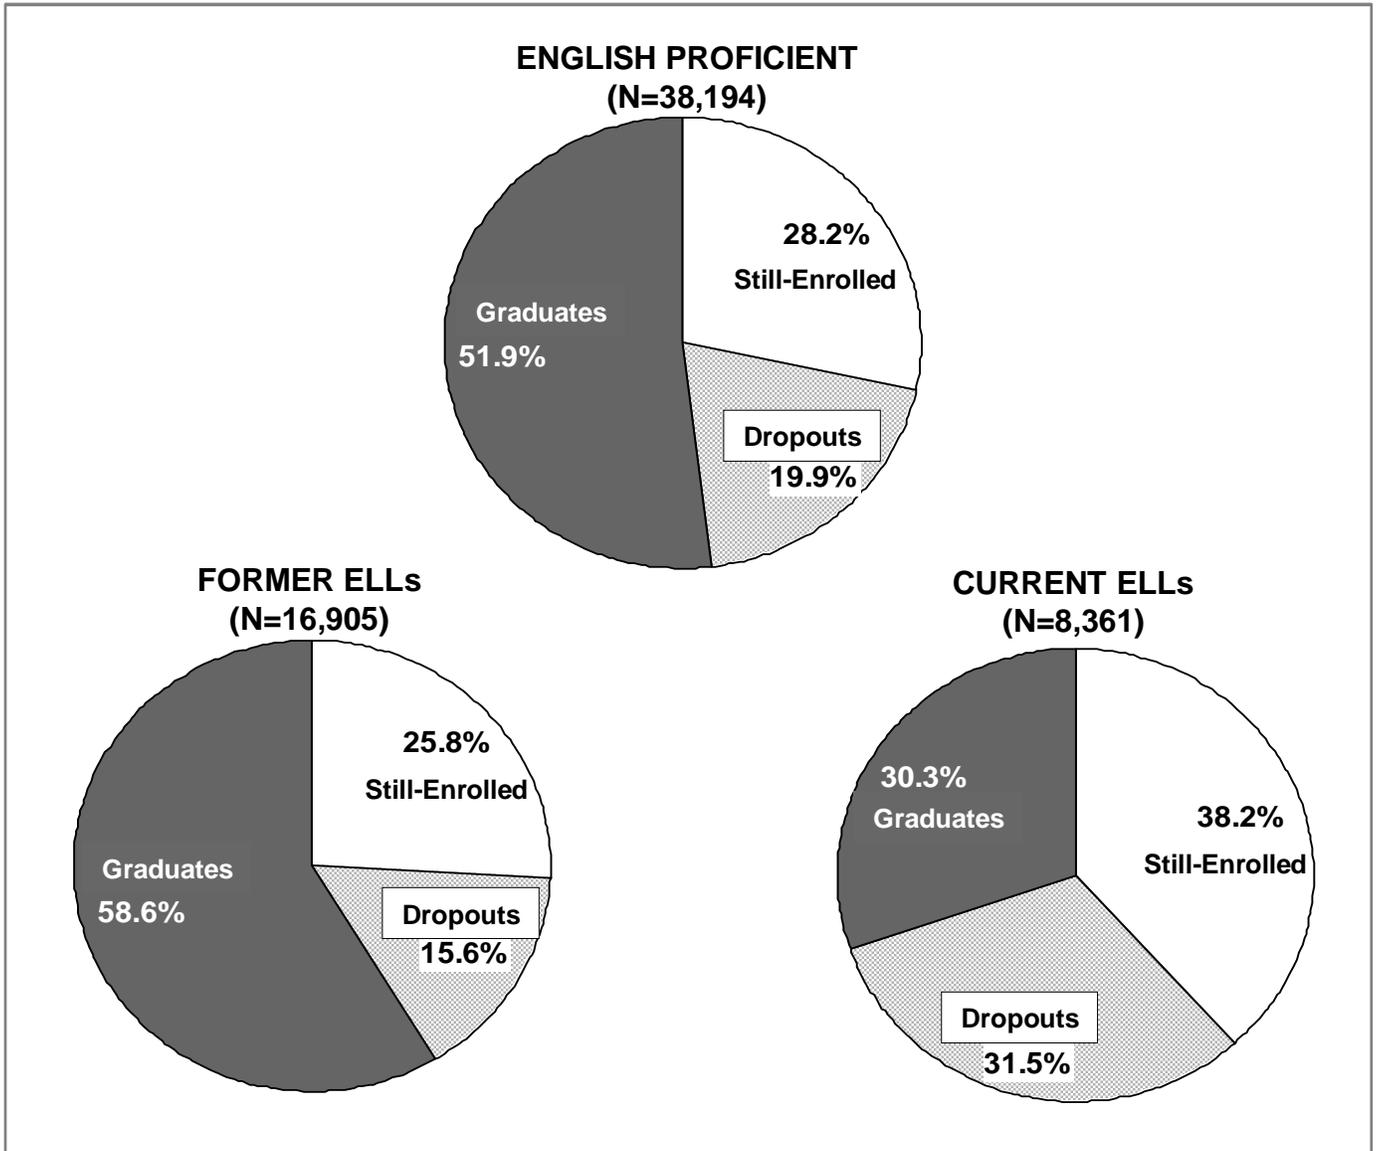

Outcomes by High school type

The high schools that students attend can be categorized into six basic types. The Specialized High Schools, the three science high schools and LaGuardia High School, require students to pass special entrance examinations. The Vocational/Technical High Schools offer programs that prepare students for jobs in a vocational or technical area or for college. The zoned Academic/Comprehensive High Schools, many of which have special programs with various admission requirements, are required to accept all students who wish to attend and live in the school's zone. There are two types of alternative high schools: Articulated Alternative High Schools that accept ninth graders and Transfer Alternative High Schools that accept students as transfers from other high schools.

Figure 5

Four-Year Outcomes for the Class of 2002 by English Language Learner Status

Data include August 2002 Graduates and DVR Updates

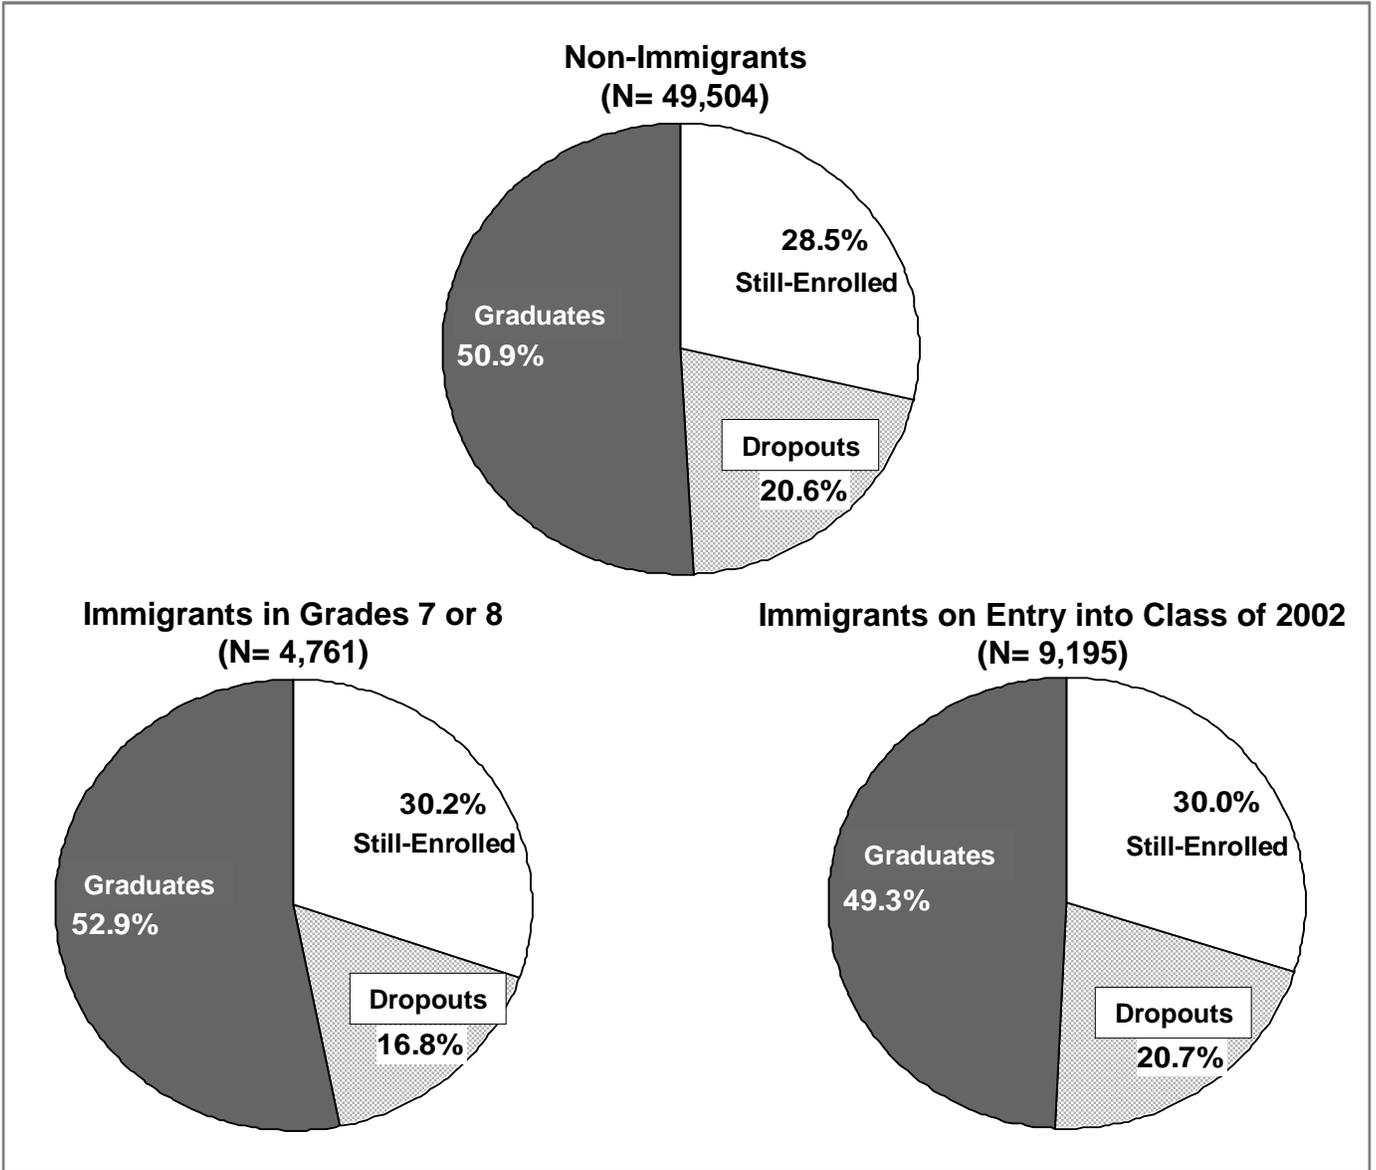

Note: Students discharged from the school system are **not** included in these analyses.

Figure 6

Outcomes for the Class of 2002, by Immigrant Status

Data include August 2002 Graduates and DVR Updates

Both types of Alternative High Schools provide smaller settings that emphasize academic and personal support. Retrieval/GED programs offer smaller settings designed for students with special problems, many of which place them at risk of dropping out such as substance abuse and criminal activity.

These programs provide individualized academic and personal assistance to their students so they can return to their high schools or prepare for the GED.

- As Figure 7 indicates, there was wide variation in the four-year outcomes for students by school type. Students in Specialized High schools had the highest on-time graduation rate (94.2 percent) and lowest dropout rate (five-tenths of a percent) Students in Retrieval/GED programs had the highest dropout rate (57.6 percent), and students in Transfer Alternative High Schools had the highest still-enrolled rate (56.4 percent).

Outcomes for Special Education students

Students in the Special Education Class of 2002 were 14 years old during the 1998-99 school year and enrolled in a citywide special education school or self-contained class in a middle school or high school. Due to the different nature of the programs, results for the Special Education Class of 2002 are reported separately for students in citywide programs (District 75) and high school self-contained classes. After excluding 463 students in citywide special education programs who were discharged to other school systems, 1,251 students were identified as members of that group. After excluding 1,108 students in high school self-contained classes who were discharged to other school systems, 4,345 students were identified as members of that group. The results for the Special Education Class of 2002, reported in Figure 8, indicate the following:

- The dropout rate for students in District 75 citywide programs was 21.7 percent, and the dropout rate for special education students in self-contained classes was 30.3 (See Figure 8). The dropout rate for students in citywide programs decreased by 0.7 of a percentage point over the Class of 2001. The dropout rate for students in self-contained classes increased by 0.5 of a percentage point over the Class of 2001.
- The four-year graduation rate for District 75 citywide programs decreased from 2.3 percent for the Class of 2001 to 1.8 percent for the Class of 2002. The four-year graduation rate for special education students in self-contained classes increased to 9.6 percent, 0.9 of a percentage point higher than for the Class of 2001.

Figure 7

Four-Year Outcomes for the Class of 2002 by School Type

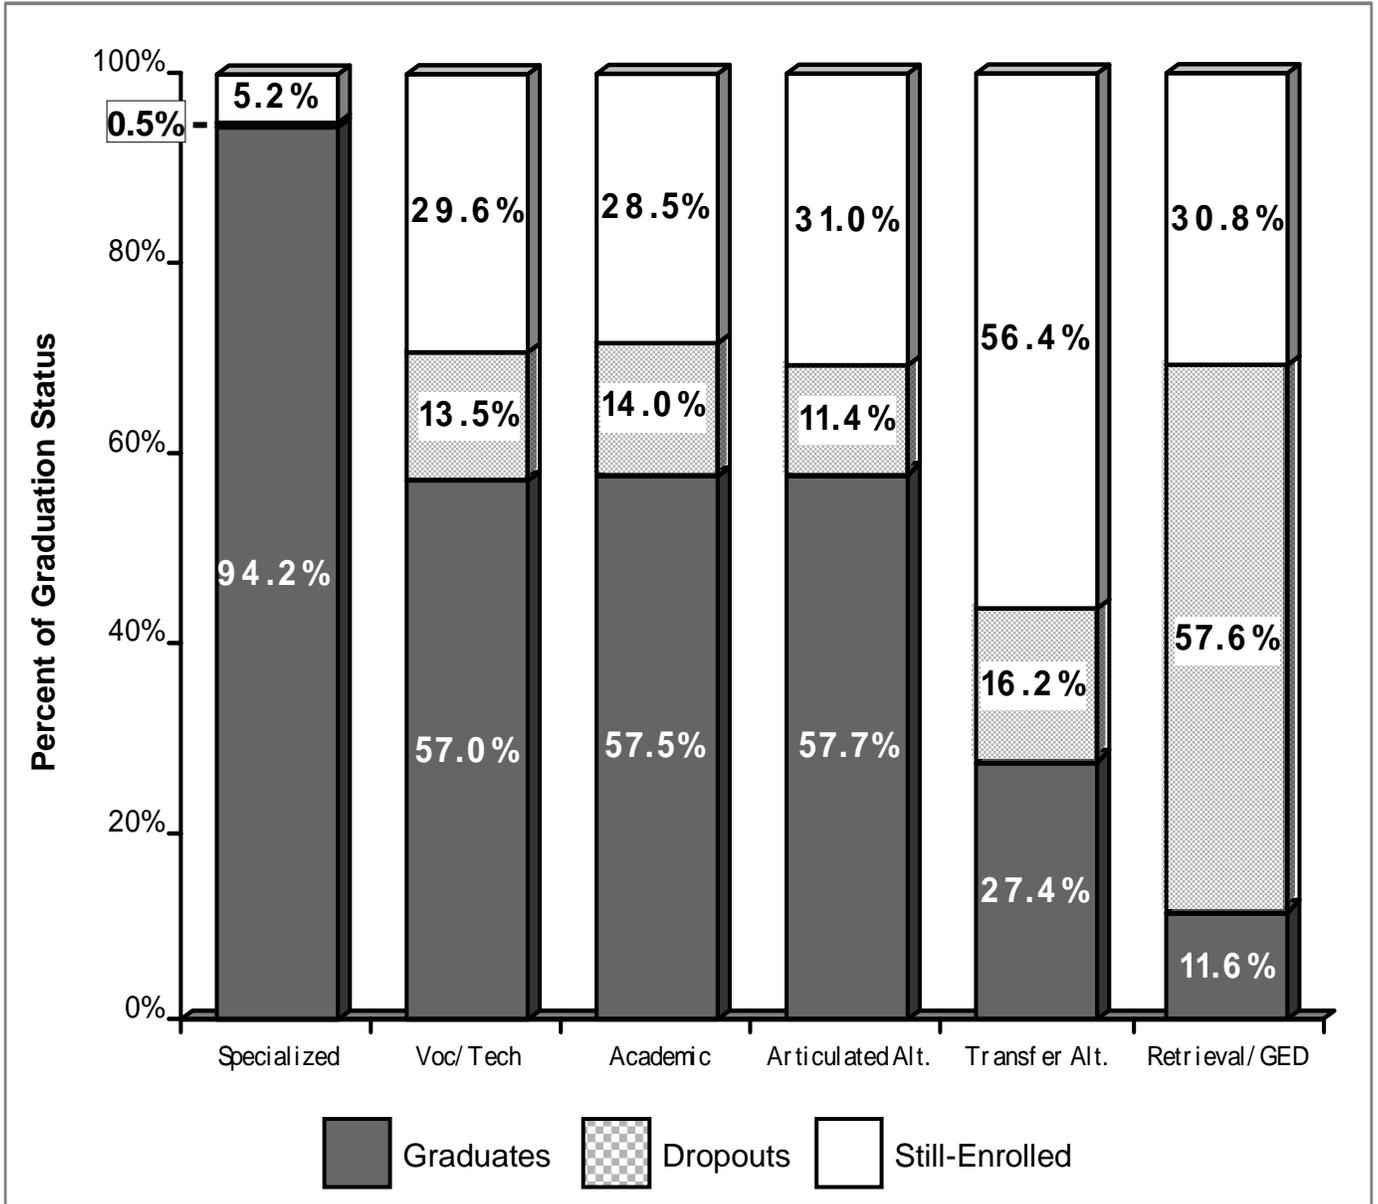

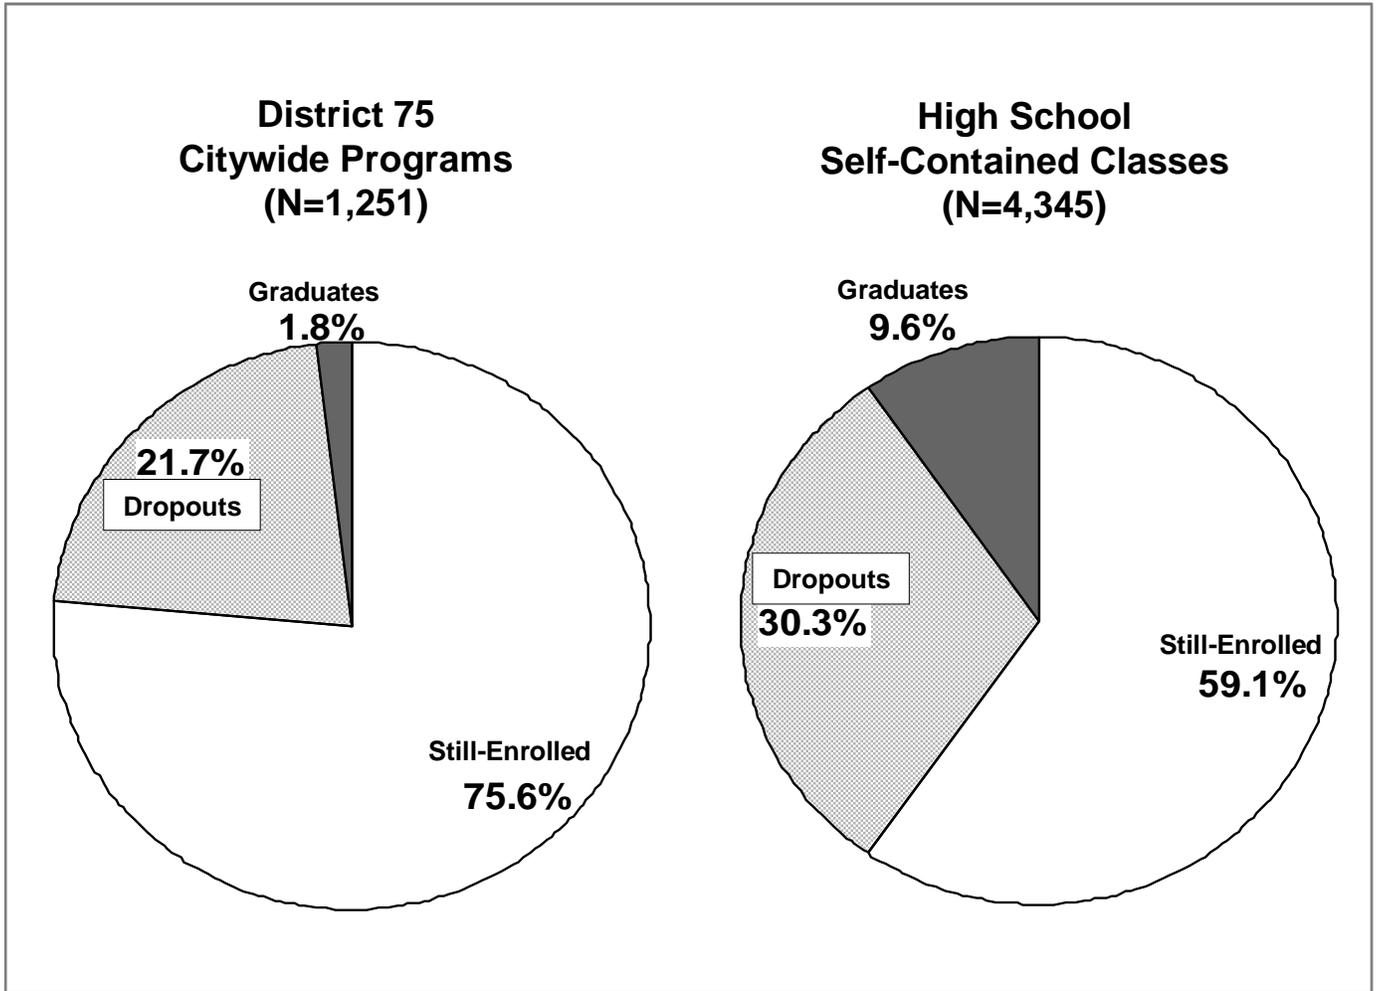

Figure 8

**Outcomes for the Special Education Class of 2002
for Citywide Programs and High School Self-Contained Classes**

Note: Percentages may not add up to 100% due to rounding.

Note: Data do **not** include students who were discharged from the school system.

- About two-thirds (59.1 percent) of the high school special education students in self-contained classrooms and three-quarters (75.6 percent) of the students in District 75 citywide programs were identified as still enrolled in school as of June 30, 2002. That such large percentages of special education students are still enrolled after four years is not surprising. Many special education students are in programs designed to provide services until students are 21 years old. At that time many of these students are expected to participate in adult programs for former special education students.

Trends

Trends across classes

- Dropout rates have been tracked longitudinally for the past several years. As Table 5 shows, the dropout rate for the Class of 2002 was comparable to—if not slightly lower than—that of the Class of 2001. This decline slowed an upward trend which began in 1999.

Trends in event dropout rates

The event dropout rate represents the number of students who dropped out of high school for the first time during the 2001-02 school year, regardless of when they entered the system. Students are counted as dropouts if they left school by the end of the 2001-02 school year without re-enrolling in another educational setting leading to a high school diploma or GED. Only students who were first-time dropouts during the 2001-02 school year are counted in this analysis. The counts include all students in the schools, including students in self-contained special education classes. Results reflect updates from the Discharge Verification Roster (DVR), which is used to verify the status of all students discharged from the school system. Individual school event dropout rates as well as citywide and superintendency rates appear in Appendix C.

As noted in Table 6, event dropout rates have increased each year since 1997-1998. In conjunction with stagnant cohort dropout rates, these data continue to be a cause of concern.

CONCLUSIONS AND RECOMMENDATIONS

Overall, just over one-half (50.8 percent) of students in the Class of 2002 graduated, and just over one-fifth (20.3 percent) of the class dropped out at the end of the four years. The remaining 30 percent were enrolled for a fifth-year of high school. The graduation, dropout and still-enrolled rates for the Class of 2002 were comparable to those of the Class of 2001. These data suggest that the increase in the percentage of students dropping out in the last several classes may be slowing. However, there has not been a corresponding increase in the graduation rate although, the percentage of graduates awarded Regents-Endorsed Diplomas and Regents-Endorsed Diplomas with

Table 5

**Comparison of Four-Year Outcomes for
the Classes of 1992 to 2002**

<i>Class of:</i>	<i>Dropouts</i>	<i>Graduates</i>	<i>Still-Enrolled</i>	<i>Total N</i>
<i>1992</i>	19.1	50.7	30.2	60,161
<i>1993</i>	18.4	49.7	31.9	61,359
<i>1994</i>	18.3	50.7	31.0	63,159
<i>1995</i>	18.1	48.2	33.7	65,254
<i>1996</i>	16.4	48.3	35.3	66,536
<i>1997</i>	15.9	48.4	35.7	66,703
<i>1998</i>	15.6	49.7	34.6	63,803
<i>1999</i>	17.5	50.1	32.4	65,748
<i>2000</i>	19.3	49.9	30.8	67,072
<i>2001</i>	20.4	51.0	28.6	65,727
<i>2002</i>	20.3	50.8	28.9	63,460

Note: Students who were discharged from the school system **are not** in the above results.

Data include August graduates.

Table 6

Event Dropout Rates for the Last Six School Years

<i>School-Year</i>	<i>Register</i>	<i>Dropouts</i>	<i>Event Dropout Rate</i>
<i>2001-2002</i>	302,368	21,903	7.2
<i>2000-2001</i>	301,271	22,323	7.4
<i>1999-2000</i>	297,932	20,868	7.0
<i>1998-1999</i>	304,589	20,416	6.7
<i>1997-1998</i>	309,807	16,226	5.2
<i>1996-1997</i>	306,554	15,418	5.0

Note: Students who were discharged from the school system **are not** included in the above results.

Data include August graduates.

Honors has been increasing for graduating cohorts since 1996 and did so again for the Class of 2002.

These outcomes appear to be related to the profound changes that are occurring within our schools. The New York City Public schools have maintained a systemic focus on rigorous academic standards of all students for the past several years. The movement in the city towards a standards-based education system during the past several years has occurred at the same time that the State Education Department has introduced new and more rigorous graduation requirements. Students in the Class of 2002 were required to pass Regents examinations in English, Mathematics, U.S. History and Government and Global History, and students who entered the ninth grade in fall September, 2001 will be required to pass Regents examinations in five subject areas (mathematics, English, global history, United States history and government, and science) in order to graduate from high school.

Close attention to the findings of the studies of the Classes over the past several years have led to a number of recommendations for the systemic improvement of our schools. In coordination with efforts to improve attendance and to prevent dropouts, high schools have implemented several instructional initiatives to enable a diverse student population to meet standards and graduation requirements. Depending on assessed needs, academic intervention services to support students include:

- Reduced class size in standards-based English, mathematics, science and/or social studies courses;
- Programs focusing on secondary literacy and numeracy;
- Additional period(s) of instruction in the content areas of English, math, science and/or social studies;
- Stretch courses (more than two terms) in required content areas with additional in-class instructional support;
- Additional instruction before and after school and/or on weekend;
- Individual and small-group tutoring to improve basic skills;
- Summer school programs for students who are failing or are at risk of failing to meet standards;
- Establishment of Young Adult Borough Centers (YABC) for students who are unable to attend high school during regular school hours;
- Increased parent involvement in their children's learning and outreach activities, such as the Chancellor calling parents and encouraging e-mail and letters.

In addition to direct instructional support, the high schools are implementing sustained professional development that provides teachers with strategies, methods, and activities to improve instruction and student success. More specific and sustained focus on the support and encouragement of students who fear they may 'age-out' without ever meeting the new standards could help to keep more of these students in school long enough to meet the new requirements.

APPENDIX A

SCHOOL-LEVEL ANALYSES FOR THE CLASS OF 2002

Number of Students
Percent of Students

NOTE: In the following summary tables, school completion outcomes for schools with fewer than 20 students are not presented. These outcomes are presented in superintendency and city totals. As a result, the totals are larger than the sum of the school-level data.

**Four-Year Outcomes (Number of Students)

APPENDIX B

SCHOOL-LEVEL OUTCOMES
FOR THE CLASSES OF 2000, 2001 AND 2002

Number of Students
Percent of Students

NOTE: In the following summary tables, school completion outcomes for schools with fewer than 20 students are not presented. Schools with three years of data are included in the tables. These outcomes are presented in superintendency and city totals. As a result, the totals are larger than the sum of the school-level data.

**School Level Outcomes

APPENDIX C

2001-2002 EVENT DROPOUT RATES

The event dropout rate represents the number of students who dropped out of high school during the 2001-02 school year, regardless of when they entered the system. Students are counted as dropouts if they left school by the end of the 2001-02 school year without re-enrolling in another educational setting leading to a high school diploma or GED. Only students who were first-time dropouts during the 2001-02 school year are counted in this analysis. The counts include all students in the schools, including students in self-contained special education classes. Results reflect updates from the Discharge Verification Roster (DVR), which verifies the status of all students discharged from the school system. Individual school event dropout rates as well as citywide and superintendency rates appear in Appendix C.

The number of dropouts reported here differs from the number summarized in the “High School Non-Completion Rates” section of the “2001-2002 Annual School Reports” because of differences in decision rules for counting dropouts and for reflecting students’ status as of June 30th.

MINIMUM TESTING REQUIREMENTS

NOTE: School districts may establish diploma requirements in addition to those outlined.

FOOTNOTES FOR DIPLOMA REQUIREMENTS CHART

(Section 100.5 of NYCRR)

- (a) Four credits required, including 1 unit in U.S. history and government and 1/2 unit each in participation in government and economics.
- (b) Students may meet the learning standards in technology, either through a course in technology education or through an integrated course combining technology with mathematics and/or science. A commencement-level course in technology education may be used as the third unit of credit in science or mathematics, but not both.
- (c) The arts are defined as dance, music, theater, and visual arts.
- (d) Students taking a sequence of not less than 5 units of credit in career and technical education (CTE) or the arts may substitute another 3-unit or 5-unit sequence in place of the 3 units in a language other than English (LOTE).
- (e) To earn the advanced designation, the student must complete one of the following:
1. A language other than English (3 credits)
 2. CTE (5 credits)
 3. The arts (5 credits)
- (f) For students entering grade 9 prior to the fall of 2001, participation in physical education is required at the equivalent of 1/2 unit of study per year. Starting with 9th graders entering in 2001, 2 units of credit in physical education are required for graduation.
- (g) For students entering grade 9 prior to the fall of 2001, diploma requirements include two 3-unit sequences, selected from mathematics, science, CTE, and the arts; or one 5-unit sequence in English or social studies.
- (h) Districts may establish a passing score no lower than 55.
- (i) Scoring ≥ 65 on Regents in both seq. mathematics I and II, OR by scoring ≥ 65 on mathematics A.
- (j) Scoring ≥ 65 on Regents in seq. mathematics III, OR by scoring ≥ 65 on mathematics B.
- (k) Students who complete Checkpoint A and two units of study in a single language other than English no later than the end of grade 8 must pass the second language proficiency examination in order to earn one unit of credit toward the high school diploma.
