School Overview

The mission of our school is to provide students with an in-depth, well-rounded education that emphasizes science and mathematics. Classroom teaching and learning are complemented with authentic, inquiry-based research experiences. The combination of research and teaching experience prepare students to become critical thinkers and problem solvers to pursue careers in biological sciences, physical sciences, mathematics, engineering and veterinary sciences. The physical, emotional and social well-being of our student body is nurtured through advisories, community service, and a small and personalized learning community.
