

If you suspect the student might have a hearing loss

Each parent must have the child's hearing screened at the Annual Physical. If the child does not pass the screening, then the pediatrician is responsible for referring the child to an appropriate clinic/hospital, for a complete audiological evaluation (CAE). If the hearing loss persists, or if it is untreatable, then the community Audiologist makes appropriate recommendations for hearing aids and sends a referral to a **CSE AUDIOLOGIST** for initiation of Hearing Education Services. If an FM Unit is also being requested, the Audiologist also sends the **CSE AUDIOLOGIST** a copy of a note of Medical Clearance signed by an M.D., such as the ENT.
