

New York City Department of Education
High School Core Curriculum Supports
2013-14 School Year

Overview

The New York City Department of Education conducted an extensive materials review process to find the best Common Core-aligned supports available for schools across the city. However, that review process surfaced no strong Common Core-aligned curriculum materials for high schools. As a result, the DOE will leverage partnerships with SED and the work of our Common Core Fellows to help provide materials for ELA and mathematics high school teachers. This document provides an overview of the current and forthcoming resources for high school teachers.

English Language Arts Resources

| Resource | Resource Description | Timeline | Location |
|----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|-----------------------------------------------------------------|
