This *Directory of New Schools* will help to guide you through the next steps in High School Admissions. This book contains information about Round 2 High School Admissions and the new school options available in Round 2.

WHAT IS ROUND 2?

Round 2 is open to all high school applicants, even if you received a match in Round 1. During Round 2, you can apply to new small high schools and to any other high school programs that have available seats.

You should participate in Round 2 if you...

...did not apply in Round 1

...did not receive a match in Round 1. If you did not receive a match in Round 1, you will automatically move on to Round 2 and must submit a Round 2 application. To learn more about how to get an application and when to submit it, please see the “How to Apply in Round 2” section below.

...are unhappy with your Round 1 match. If you receive a match in Round 2, it will take the place of your Round 1 match. Students with a Round 1 offer who reapply in Round 2 but do not get a match will keep their Round 1 offer. You will not be able to choose between Round 1 and Round 2 offers. No appeals will be considered to regain an offer.

All students will have a high school match by the end of Round 2.

EXPLORE YOUR ROUND 2 OPTIONS

Directory of New Schools

The schools in this Directory are new high schools that will open their doors for the first time this coming September. These schools were not included in Round 1; instead, the schools serve as new options to which you can apply in Round 2.

Round 2 Program List

In Round 2, you can also apply to high school programs with available seats. Programs with available seats, including the schools in this Directory, can be found on the Round 2 Program List. You can get a copy of this list from your guidance counselor.

On the Round 2 Program List, schools and programs are listed in alphabetical order by borough. The list shows the type of seat(s) available for each program: General Education, Students with Disabilities (which includes students receiving Integrated Co-Teaching or Special Class services), or both. You will also find the approximate number of seats available for each program. Check out the *Directory of NYC Public High Schools 2013-2014* for detailed descriptions for all the schools on the Round 2 List.

Round 2 Fair

In addition to reviewing this Directory and the Round 2 Program List, you can learn more about your options by attending the Round 2 Fair. At the fair, you'll be able to meet with representatives from schools in Round 2 to find out more information about their programs. High school admissions counselors will also be there to answer your questions.

When: Saturday, March 15 and Sunday, March 16, from 11:00 AM to 2:00 PM each day

Where: Martin Luther King, Jr. Educational Campus
122 Amsterdam Avenue (between 65th and 66th Streets), New York, NY 10023

HOW TO APPLY IN ROUND 2

After you have reviewed your options in this Directory and the Round 2 Program List and visited with schools at the Round 2 Fair, meet with your guidance counselor to obtain your Round 2 application. An application can also be found on the back of the results letter for those students who did not receive an offer in Round 1. You will be matched to your highest possible choice subject to Admissions Priorities, Admissions Methods, and seat availability. Consider as many programs as possible; you may choose up to 12. If you do not receive a match in either round, you will be assigned to a high school program with available seats as close to your home as possible.

The deadline for you to return your completed application to your guidance counselor is Friday, March 21, 2014.

QUESTIONS? Meet with your guidance counselor, or call the Department of Education at (718) 935-2399.

MAKING INFORMED DECISIONS

As you review this Directory, keep in mind that each high school in this book has Admissions Priorities and Admissions Methods. When researching your options, think about how you will need to prepare for the programs you want to list on your application.

Admissions Priorities

Admissions Priorities determine the order in which applicants are considered for placement. Students who fall in the first priority group will be considered for placement first; students in the second priority group will be considered next; and so on, until all available seats have been filled. Students who fall into higher priority groups have a better chance of getting into a particular program than students who fall into lower priority groups. For example, many new schools give priority to students who sign in at an information session; these students will be considered for the school *before* students who did not attend an information session.

Admissions Methods

Admissions Methods determine the specific ways in which high school applicants are admitted into high school. There are eight types of Admissions Methods, but the new schools in this Directory have the same one:

Limited Unscreened Limited Unscreened programs give priority to students who demonstrate interest in the school by attending a school's information session. You must sign in at this event to receive priority to the school's Limited Unscreened program.

For more detailed information about the different types of Admissions Methods, visit the High School Admissions website at www.nyc.gov/schools/ChoicesEnrollment/High/Admissions or read page 5 of the *2013-2014 Directory of NYC Public High Schools*.

Types of High Schools

Career and Technical Education (CTE) Schools

Career and Technical Education (CTE) schools prepare students for postsecondary success by combining academic study with applied skills in a focused career context. Students who complete state-approved programs can earn Advanced Regents diplomas upon high school graduation.

CTE schools differ by industry focus, but share common elements such as high standards for graduation, a curriculum that combines traditional academic disciplines with specific technical skills, and work-based learning experiences. CTE schools also support students' successful postsecondary transitions into employment and/or higher education by offering a final assessment measuring mastery of related concepts and skills. CTE students augment their classroom learning through job shadowing, project-based learning and internships that offer opportunities to apply what they have learned, gain valuable work experience, begin to develop their professional networks and deepen their understanding of a possible career pathway.

In this Directory, if a new school is recognized as a CTE school, a label will appear on the top right of the school's page.

NYC P-TECH 9-14 Schools

NYC P-TECH 9-14 schools are early college and career high schools spanning grades 9 through 14, which is the equivalent of high school and two years of college. Students receive a seamless experience combining high school, college, and career training to graduate with a high school diploma, an Associate's degree from CUNY, and relevant industry certification. The program sequence takes up to six years and includes CTE pathway courses, tuition-free college classes, and work-place learning experiences through industry partners. Students graduating from NYC P-TECH 9-14 schools are prepared to go into the workforce or continue their postsecondary education with transferable credits.

In this Directory, if a new school is recognized as a NYC P-TECH 9-14 school, a label will appear on the top right of the school's page.

STUDENTS WITH DISABILITIES

Students with disabilities may apply to any high school program listed in this Directory. These students will be subject to the same admissions requirements as their peers.

Every high school participating in Round 2 Admissions is expected to admit and provide services for students with disabilities. Once a student is accepted to a high school, the school will implement the student's Individualized Education Program (IEP). The IEP team at the school will welcome the student and family, and together will review the IEP to ensure that all of the student's needs are met. In some cases, the IEP team may convene to refine the IEP to better meet student needs. High school students receiving Integrated Co-Teaching (ICT) or Special Class services do not necessarily attend classes as a cohort. Each student will have individualized services in accordance with his/her IEP, and may have combinations of these services for all or part of the day, as appropriate.

District 75 students transitioning to high school who are considering a community high school should work with their District 75 school to participate in Round 2 Admissions. If a student's IEP currently recommends a specialized District 75 program, the student will be notified of his or her high school placement in May or June by the District 75 Placement Office.

For more information, visit www.nyc.gov/schools/Academics/SpecialEducation.

SITE ACCESSIBILITY

The NYC Department of Education (DOE) is committed to ensuring that its programs, services, and activities are accessible to students with disabilities, including students with mobility impairments or other physical disabilities, in compliance with the Americans with Disabilities Act (ADA). Our school buildings cover several levels of accessibility. The DOE continually reviews its schools to determine which schools are functionally accessible. Each school's Directory page indicates the Site Accessibility status of the school. There may be multiple school organizations within a school building. This Directory lists whether a school is **functionally accessible** or **not accessible**. Some school pages suggest that you **contact the school** for more information.

Functionally accessible schools are schools in which an individual with a disability may enter and access all relevant programs and spaces in the building, including science laboratories, library, cafeteria, auditorium, and the gymnasium. In some cases school classes or activities may be re-located to accommodate access. At least one restroom is accessible.

Schools that are **not accessible** cannot provide access to relevant programs and spaces within a building.

Some schools are located in partially accessible buildings that do not provide access to all relevant spaces and services in a school. For example, these schools may or may not have an elevator or ramp, but may be able to meet limited mobility needs. These school pages suggest that you **contact the school**.

For additional information regarding the accessibility status of new schools, please contact the school directly or contact the DOE's Office of Space Planning at SpacePlanning@schools.nyc.gov. For more information about accessibility in New York City public schools, look up the *List of Accessible Schools* at www.nyc.gov/schools/Offices/OSP/KeyDocuments/Accessibility.

ENGLISH LANGUAGE LEARNERS

English Language Learners (ELLs) can receive a range of programs and supports to ensure that they receive the services necessary to excel in high school.

There are three different ELL program models offered in New York City public high schools:

Dual Language (DL): Dual Language (DL) programs provide instruction in two languages (in English and in the target language of the program i.e. Spanish, Chinese, etc.), with the aim of enabling all students to become bilingual. Both ELL students and English-speaking students act as linguistic role models for each other, and through their interactions, language development in both languages is supported.

English as a Second Language (ESL): English as a Second Language (ESL) programs, are offered in all New York City public high schools and are taught in English. ESL programs may vary; some schools may offer dedicated ESL classes, while others might have content courses that incorporate ESL strategies.

Transitional Bilingual Education (TBE): Transitional Bilingual Education (TBE) programs are designed to help students *transition* to English proficiency. This is achieved by providing both language arts and subject matter instruction in both the student's native language and in English. As the student develops English proficiency, instruction in English increases and native language instruction decreases.

ELL Information in This Directory

This Directory indicates which of the ELL program models above are *currently* offered in each high school, based on self-reported data.

All high schools must issue the **ELL Parent Survey and Program Selection Form** at the parent orientation meeting. If you do not receive this form, request it from the school. Please use this form to indicate your preferred ELL program, even if your high school does not currently offer it. High schools must open up a Transitional Bilingual Education or Dual Language program when there are 20 or more ELLs with the same native language in any single grade whose parent/guardian request the program. In this way, parents can determine which ELL programs are offered in a given school.

For the most up-to-date information regarding ELL programs, please contact the schools directly. For more information about services for English Language Learners (ELLs), call 212-374-6072 or visit the Office of English Language Learners website at www.nyc.gov/schools/Academics/ELL.

Important Updates:

The following new school has an updated address:

- 1) **Benjamin Franklin High School for Finance & Information Technology (29Q313)**
 - *Address:* 207-01 116th Avenue, Cambria Heights, New York 11411

The following new schools have moved to different boroughs:

- 1) **Urban Assembly Maker Academy (02M282)***
 - *New Address:* 411 Pearl Street, New York, NY 10038
 - Please use the following new code to apply to this program: **M61A**

- 2) **Foundry High School (27Q346)***
 - *New Address:* 156-10 Baisley Boulevard, Jamaica, Queens, NY 11434
 - Please use the following new code to apply to this program: **Q69A**

The following new school is changing its location but will remain in Manhattan:

- 1) **Manhattan Early College School for Advertising (02M280)***
 - *New Address:* 411 Pearl Street, New York, NY 10038

* The opening of this school is subject to approval by the Panel for Educational Policy (PEP) For additional information, visit www.nyc.gov/schools/AboutUs/leadership/PEP/publicnotice/2013-2014/SchoolProposalsMay62014PEP. Families who apply to this school should also consider including other schools on their Round 2 Application.

Overview

The mission of the Nelson Mandela School for Social Justice is to create life-long, socially conscious leaders who use education as a powerful tool to change the world. All work within our community is guided by our core values: service, perseverance, leadership, respect, and reflection. We explore social justice themes through a challenging and engaging academic curriculum as students develop critical thinking, analytic, and problem solving skills. Service learning, collaborative projects, travel abroad, and internships will prepare our students for the demands of college and careers, and define their purpose and responsibility as global citizens.

Academic Opportunities

Program Highlights: Service learning opportunities and internships with local businesses, nonprofits and community-based organizations; travel abroad connected to community-based projects; peer mediation, social justice courses, legal studies courses, regular field trips focused on community service, global citizenship, and college exposure, Regents prep, college and career readiness, including PSAT and SAT prep classes; collaborative group work and project-based instruction; technology integration in all courses; after school and weekend programs

Overview

The Urban Assembly School for Collaborative Healthcare (UASCH) recognizes that healthcare is changing with more healthcare professionals working in collaborative teams. As a Career & Technical Education (CTE) high school, we prepare students for college and careers with a broad and deep focus on unique pathways. Our Business of Healthcare pathway teaches students how to equip and run healthcare facilities. Our Community Healthcare pathway empowers students to be health educators and patient navigators. Coursework is as challenging as it is supportive, with a strong emphasis on cross-curricular and project-based learning, including community action projects focused on health issues in NYC. A member of the highly successful Urban Assembly network of schools, U.A.S.C.H. features strong partnerships with top-tier healthcare facilities that work closely with staff to bring timely healthcare topics into the classroom and expose students to modern healthcare facilities. Graduates will be ready to serve any number of critical roles in the increasingly collaborative field of healthcare.

Academic Opportunities

Program Highlights: Regents prep curricula, rigorous project-based instruction, internships and work-based learning, academic advisement, community action and service, CTE healthcare focus with three career pathways ("Business of Healthcare," which is the administration and management of healthcare; "Clinical Healthcare," which is direct treatment of patients; and, "Community Healthcare," which focuses on proactive care, disease management and health outreach/education). UASCH also features advisory, a class that focuses on academic intervention, social-emotional learning and support, as well as postsecondary planning and preparation.

Language Classes: N/A (**Expected:** Spanish and Spanish Native Language Arts)

Overview

Inwood Early College for Health and Information Technologies is an early college and career technical education school developed in partnership with Microsoft, NY Presbyterian Hospital, and Guttman Community College. Through the school's project-based instructional program, students earn a CTE high school diploma with technical certifications, an applied associate of science (AAS) degree – at no cost – and paid work-based experience that prepares them for careers in information technology including software and hardware installation, networking, and support as well as health information technology, administration, and management. Students have up to six years to earn their AAS degrees before deciding if they will move directly into the world of work or continue their college education through the bachelor's degree level and beyond.

Academic Opportunities

Program Highlights: Advisory, Student Led Town Hall Meetings, Mentoring, Internships, Paid Apprenticeships, Individualized Academic Planning and Career Counseling, Microsoft Office Suite (MOS) and Microsoft Technology Associate (MTA) Certifications, AM and PM Faculty Office Hours for individual and small group tutoring and enrichment.

Overview

Through close partnerships with the Borough of Manhattan Community College (BMCC) and with the advertising industry, we provide all students with a strong education that prepares them for college and careers. Industry partners will provide all students with a range of work-based learning experiences including job shadowing, field trips, special training seminars, and internships. In addition, students are eligible to earn an Associate's Degree – at no cost – while still in high school. Students can stay at our school for up to six years and graduates leave ready to go directly into careers and as strong candidates for 4-year colleges.

Academic Opportunities

Program Highlights: Early College experience leading to a free associate's degree from BMCC; internships and apprenticeships in the advertising and media industry; professional mentor program; small advisory groups led by faculty mentors; Microsoft Office Specialist Certifications; Adobe Certified Associate Program; Communications and Advertising Design Certification; college and career trips

Overview

The Urban Assembly Maker Academy (UA Maker) prepares students for college and careers by focusing on industries that creatively use technology to solve problems. Students will use technology every day in a highly personalized environment that engages professionals at the top of their fields to guide project-based learning. Our school features new kinds of classroom experiences that recreate what the workplace looks and feels like for tech professionals. We support and empower students to become the next generation of designers and inventors. In challenge-based courses, students tackle real problems in the world and, as they experiment with solutions, develop the skills, tools, and habits of inquiry to be tomorrow's "makers," contributing to the internationally booming "Maker Movement."

Academic Opportunities

Program Highlights: Regents prep curricula; internships; academic coaching; small group advisory; courses in coding, digital fabrication, design thinking, and web applications; PSAT/SAT prep; college and career counseling beginning in students' first year; work site visits; challenge-based courses; personalized and blended learning; personalized pathway to graduation; digital badges and digital portfolios

Overview

At the Benjamin Franklin School for Finance & Information Technology (Franklin IT) our mission is to provide young men and women with the foundations for success in college and for careers in Information Technology & Finance. As a Career & Technical Education (CTE) school, we will nurture and support our students while providing rich, industry-approved coursework and recognized certification in the fields of IT & Finance. Our curriculum will focus on communication skills, critical thinking, and personal and academic planning. Franklin IT students will work on project-based and hands-on learning activities that develop college-readiness skills and offer them an edge in their future careers.

- Academic Portfolio Required
- Community Service Required
- Extended Day Offered
- Extended Year Offered
- Internship Required
- Summer Session Offered
- Weekend Program Offered

Overview

Students attending Business Technology Early College High School (B-TECH) will use technology to solve everyday world problems. Our students will become expert readers, writers, and critical thinkers with the technical skills to be successful in our modern, information-based global economy. Students have up to six years to earn a high school diploma and an Associate’s degree – free of cost – from Queensborough Community College. Students also receive hands-on job training and apprenticeship with SAP (an international enterprise software development company). Upon graduation, our students will have the knowledge, skills, Career and Technical Education certifications, and work experience to make them highly competitive for employment and/or four-year colleges.

Academic Opportunities

Program Highlights: Associate’s degree – at least 2 years of college coursework in business, computer science, and internet technology; college classes as early as the 9th grade; college and career advisement; mentoring and peer tutoring programs; internships and apprenticeships; student-led conferences; students e-portfolio; collaborative group project-based learning

Overview

Foundry High School prepares students to explore, engage, and excel in an increasingly interconnected world. Through a well-rounded, personalized education, infused with technology and geared toward college readiness, our students will emerge as leaders and change agents. We endeavor to inspire life-long learners who seek to make their community a better place, both locally and globally.

Academic Opportunities

Program Highlights: Courses at Foundry High School will culminate in meaningful work products and portfolios. For example, an environmental studies course might end in the design of a green roof, and a forensics course might lead to a mock crime-scene investigation and report. In addition to a variety of course work, electives, internships, and digital learning, students may propose new courses as well as explore subjects independently through a supported online learning model. Foundry High School will support students by developing close teacher-student relationships, pairing each student with a teacher-advisor for four years. The small school environment, with around 100 students per grade, will ensure that all adults and children know and are known by one another. Students will be prepared for the college or career of their choice through an array of intensive reading and writing development courses, mathematics support, College Now and Advanced Placement courses, SAT preparation, college visits, and an intensive 4-year college and career advisement program.

Language Classes: Spanish

Online Language Classes: N/A (*Expected:* various, based on student interest)
