A Letter from the Deputy Chancellor for Teaching and Learning

Dear Colleagues,

Welcome to the Teaching and Learning's section of the *Winter/Spring Professional Development Catalog*. This volume includes a schedule of professional development programs attuned to the needs of your school. Courses included in this catalog cover the period from February through the end of June. We will continue to add new professional development offerings to support schools, so please check back often. The online professional development catalog, which will be updated with new course information, can be found at www.nyc.gov/schools/employees.

In addition to offering professional development opportunities, I am delighted to announce that the Division of Teaching and Learning is now offering customized professional development and consultation services for your school or network. Please contact the office(s) you are interested in working with directly (see Contact Information) or Melissa Hamann (MHamann@schools.nyc.gov) for more information on these services.

We want to be your partner in providing our students with the high quality education that they deserve. So, please let us know what professional opportunities would be of most use to you, and in what format, and we will try to accommodate your requests as we continue to develop our offerings for the year. You can send all of your suggestions and requests to Melissa Hamann by e-mail at MHamann@schools.nyc.gov.

We look forward to working closely with you to make all of the New York City schools and educators the stars that we all know they should and can be.

Sincerely,

Marcia V. Lyles, Ed.D.

1/2008

We would like to thank our Chancellor, Joel I. Klein, and Deputy Chancellors Kathleen Grimm and Marcia V. Lyles for their support in the production of this catalog. Special acknowledgement goes to Daniel Greenblatt, Christopher Sgarro, Jim McDermott, and Melissa Hamann for their tireless work compiling, editing, and producing this catalog. Thanks also go to the many individuals in offices across the Department of Education, who contributed material, ideas, and hours of hard work to this project.

We Value Your Feedback

Our goal in creating this catalog was to create one place where schools could learn about PD offerings provided by the New York City Department of Education. Please tell us how we can make the next version of this catalog more useful for you. If you have any suggestion/comments/ideas, please let us know by e-mailing MarketMaker@schools.nyc.gov

Registration and Payment Instructions

To find out how to purchase and register for a particular professional development session, please refer to the specific instructions provided with the catalog entry. **For professional development courses offered for a fee, you will need to work with your principal to purchase the session first to secure your spot and then complete the registration process as well.** For further information on payment in FAMIS and registration, please read the following instructions.

Part I: Payment via FAMIS

If the professional development course you are interested in does **not** have a fee, please proceed to “Part 2: Registration.” Otherwise, principals should follow these instructions to purchase selected sessions:

1. To purchase services from an Internal DOE provider, principals will need to first create a budget item in the Table of Organization in Galaxy. This process is exactly the same as for any OTPS item, but principals will select the newly created title *Internal DOE Services – 0998*. This title points to Object Code 0998 in FAMIS. Note that only Tax Levy funds can be scheduled into 0998.
2. Principals should then log in to FAMIS at <https://dfoforms.nycenet.edu/FamisPortal>.
3. To purchase internal services, principals should select “Purchasing,” “Contracted,” “E-Catalog,” and click “Internal Services.” Enter the FAMIS Item Number to locate the desired session.
4. Principals should enter the participant’s name and e-mail address in the “Notes/(Special Delivery Instructions)” section of the FAMIS entry so that offices know which session schools are purchasing and for whom schools are purchasing this session.

Part 2: Registration

Please refer to the specific offering you are interested in to identify the appropriate registration method. You may be directed to e-mail a particular staff member or external partner, complete an online survey, or register via Protraxx. For further information on signing up via Protraxx, please read the following instructions.

Registering Via Protraxx

1. On your computer’s Internet browser, go to the website <http://pd.nycoit.org> (please note that there is no “www”), and click on the words “Click here to enter the new online PD registration system” to access Protraxx.
2. If you already have a Protraxx account, log in with your Username and Password (if you’ve forgotten them, click on the link that says “Forget Username/Password?,” and they will be sent to your e-mail address).
3. If you do not already have a Protraxx account, click on the button that reads “Click here to register” and follow the directions to create an account.
4. At the top of the screen, under “Department,” please select the department you are looking for from the drop down menu.
5. Scroll down to locate the session for which you wish to register, and click the button that reads “Enroll Now.”
6. Within two to three business days, you will receive an e-mail confirming your participation in this workshop. **Please remember that for sessions that require payment, your registration is not confirmed until your principal purchases the selected session in the FAMIS system.** Your attendance is not confirmed until you receive this e-mail. If you do not receive the e-mail, please follow up with the appropriate department for more information (see Contact Information).

Questions

- If you have any questions about purchasing internal services, please contact the Client Services Team at (718) 935-4444.
- If you have questions about registration or the professional development session content, please follow up with the appropriate department for more information (see Contact Information).

Mathematics Intervention: The Bar Model Approach to Problem Solving

This half-day PD session will provide participants an opportunity to investigate how the application of bar models in mathematics problem solving can be a tool for academic intervention. Participants will receive research information on the use of bar models in symbolic representation—the mainstay of algebraic reasoning. Participants will have the opportunity to explore, investigate, and present lessons involving bar models and compare the concepts in the lesson to relevant mathematics assessment items.

HALF-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: Teachers, Math Coaches, Administrators
Grade Level: PreK-6
Facilitator(s): Nickelos Grant
Start Date(s): 2/14
Time: 8:45 AM–11:30 AM
Location: Manhattan
Cost: \$25
FAMIS Item No: TLAIS1027
To Register: ngrant2@schools.nyc.gov

Effective Vocabulary-Building Strategies

This training will offer an overview of the National Reading Panel's (NRP) third subgroup: reading comprehension, including development of vocabulary skills. The training will present five direct and explicit teaching strategies that will improve student vocabulary, as outlined by NRP: (1) Direct and Explicit Vocabulary Instruction; (2) Implicit Instruction; (3) Multimedia Methods; (4) Capacity Methods; and (5) Association Methods.

1-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: Teachers, Coaches and Administrators
Grade Level: 4-12

From Rhyme to Reason: Building Phonemic Awareness Skills in Young Children

This workshop will present a context for phonemic awareness skills and describe their impact on early reading acquisition. Engaging student activities that build phonemic awareness skills and can be readily employed in the classroom will be demonstrated. This lively workshop is being repeated due to popular demand in the past.

HALF-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: Teachers, Administrators, Coaches
Grade Level: K-3

Anita Archer's Rewards Elementary Word Attack Program

The dynamic Dr. Anita Archer will present this popular short-term word attack program designed to help struggling readers decode larger, multisyllabic words. Dr. Archer demonstrates effective strategies for active engagement of students, as well as assessment and instruction methodology. Each participant will receive a teacher guide, student book, and set of transparencies (totalling over \$100) drop-shipped to his or her school. Register early as this series typically sells out quickly.

Building Reading Fluency Builds Comprehension

This training will offer an overview of the skills students need to build upon their fluency and to gain better comprehension of the material they are reading. Instruction will emphasize the phonological deficit model and rapid automatic naming deficit and its impact on fluency rates and reading comprehension. This training will also cover such topics as determining a student's fluency rate and creating effective fluency training programs. At the conclusion of this training, participants will be able to access the fluency rates of their students and create instructional materials to build up fluency rates, hence increasing their students' comprehension levels.

ARTS & SPECIAL PROJECTS

Video Assessment for the Performing Arts

Video is an important tool in assessing performing arts programs. It allows teachers to document student progress, skills, and understandings, and provides examples of student and teacher reflection. Through a combination of examples, hands-on activities, best practices, and take home assignments, participants will learn to plan, shoot, storyboard, and edit their own footage to create original short assessment videos. This course is designed for teams of up to three performing arts teachers to include at least one teacher of theater. Teams that complete the PD will receive video equipment for their school. Teachers may elect to take this course for P-Credit OR 30 hours of training rate to be paid by their school. This 7-day series will be held on 2/2, 2/7, 2/28, 3/15, 3/27, 4/5, 4/17.

Supporting Your Child with Elements of Second Language Learning

This workshop is one of several in a series for parent coordinators and ELL parents, entitled: What is My Child Learning? A Professional Learning Series for Parents of ELLs. Students learning English as a second language must learn to listen, speak, read and write in the new language. This three-hour workshop focuses on activities that parents can use to promote English language learning in each of these areas, preparing their child for the NYS English as a Second Language Achievement Test (NYSESLAT). Interpretation is available upon request.

Demystifying ELL Data

In this 2-day institute, participants examine the role of data as a tool for teaching and learning for English Language Learners (ELLs). The session provides a uniform set of guidelines for using relevant performance and demographic ELL data effectively at the school level. Also, participants make connections between ELL data and achievement goals, providing a basis for evidence-based decision-making. Using impact data analyses through a variety of reporting and assessment tools (i.e., ATS functions and reports, ELA, Math, and NYSESLAT results), schools develop a clear understanding of where they are and where they want to be. This series will be held 3/18-19, 4/8-9, 5/20-21.

From Information Literacy to Information Leadership

Assessing the relevance and reliability of information is a crucial skill for all educators to master and model. But that type of information literacy is only the beginning. With the explosion of information coming online, school leaders need to employ successful strategies for finding, managing, and communicating what's significant for their own practice and for that of their constituents. This workshop will cover the tools that information leaders are using and the strategies to use them well.

Geometry and Measurement Unit with Geometer’s Sketch Pad

Discover how to use Geometer’s Sketch Pad and web resources to enrich instruction in a geometry and measurement unit. This PD is designed to enable teachers with access to a projector and classroom set of Internet-ready computers to enhance teaching and learning using 21st century tools. Created by NYC math teachers in conjunction with NYCDOE Department of Math staff and technology integration specialists, this PD consists of eight 45- to 60-minute sessions structured around the workshop model. Sessions use Impact mathematics as the focus of the core curriculum, but can be used with any math program. They are aligned to the New York State mathematics standards for MS, the National Educational Technology standards, and the National Staff Development Council standards. Participants must bring a charged laptop, spare battery, and power cord to class. Please note: this is a TWO-DAY workshop

Digital Movie Making for Students

In this six-week session, students in grades 6-12 will learn how to use research to produce storyboards, scripts, documentaries, videos, and short films. This theme-based offering encourages young people to use film and video to creatively express personal concerns, explore important social issues and share engaging stories about the world today. Students will showcase their video/film talents. The showcase will be unique in its focus on the media arts accomplishments of students and is open to students who have written, directed, edited or produced a short film (10 minutes or less). It will also identify and celebrate artistic excellence, technical achievement, and originality in work created by individual students. This 6-day PD is held in multiple locations on 3/29, 4/5, 5/3, 5/10, 5/17, 5/31.

Preparing Accelerated 8th Grade Students for March and June Testing In Math

Students currently enrolled in accelerated 8th grade mathematics classes that are taught Integrated Algebra will take the NYS 8th grade math exam in March and the Integrated Algebra Regents in June. This PD will provide insight into effective work with students to prepare them successfully for both exams. Participants will look at modified pacing programs that provide review of work for the NYS 8th grade math exam and in preparation for the NYS regents.

1-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: MS Math Teachers, Coaches, Supervisors
Grade Level: 6-8
Facilitator(s): Elaine Carman
Start Date(s): 1/24
Time: 8:30 AM–3:00 PM
Location: Manhattan
Cost: \$75

Supporting Teachers in the Implementation of Impact Mathematics

Participants in this workshop will explore the sixth, seventh, and eighth grade Impact Mathematics core curriculum and develop strategies to differentiate instruction for all students as they progress through the course work. Pacing will be reviewed, assessments will be explored, and the various component pieces of Impact Math will be integrated to provide models of support deliverable to math teachers that participants support in the schools.

2-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Boosting Student Achievement in Math (Grades 7 to 12)

In this series, we will share activities designed to actively engage students in the process of learning and constructing their own meaning. We will analyze NYC data and standard assessments which place more emphasis on problem solving and communication, and explore ways to build student motivation and achievement in these areas, particularly for struggling students. Among other topics that will be discussed are the use of manipulatives (including low-cost/no-cost manipulatives) and the latest research on how people learn mathematics. These are useful materials and strategies for math teachers from grades 7-12.

2-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: Math APs, Coaches, Teachers
Grade Level: 7-12

Workshop on Brain Research and Its Implications in the Classroom

Neuroscience, like pedagogy, looks at learning, but from a substantially different point of view. This difference can be illuminating and exciting in its implications for classroom practice. We'll explore the latest research in neurobiology; our emphasis throughout will be on the practical applications of this research to math instruction in all grade levels.

2-DAY PD OCCURS MORE THAN ONCE. DETAILS BELOW.

Target Audience: School Administrators, Coaches, Teachers
Grade Level: K-12
Facilitator(s): Ronald Schwarz & Miguel Cordero

How to Promote Interactive Learning in Mathematics Using Hands-On Material

This is a series of two all-day workshops, which will feature a variety of activities appropriate for MS mathematics teachers and coaches. Each workshop will provide interactive learning experiences designed to be consistent with the NYS Mathematics Standards. Samples of activities correlated to Impact Math in grades 6, 7, and 8 will be explored. The hands-on activities presented in each workshop will help participants disseminate ideas for concretization of mathematical principles promoting content-rich interactive learning in the mathematics classroom and opportunities to explore NYS and NYC assessment items. Through the use of concrete materials (manipulatives), participants will be able to plan, organize, construct, and implement their own mathematical experiences. Pertinent articles will be disseminated in each workshop.

Teaching High School Geometry—Introducing the Next Level (Two Days)

Beginning in September 2008, students in NYS will be studying a new 10th-grade math course, Geometry. Although geometry topics have been taught in Math A and B (and Sequential Math before them), there has not been a complete Geometry course in NYC for more than 30 years. To maximize student achievement, we will be offering two full days of professional development. Participants will have an opportunity to: 1) Examine current and innovative pedagogies related to the teaching and learning of geometry. 2) Expand teachers' knowledge of geometry. 3) Integrate technology and manipulatives into the study of geometry.

2-DAY PD OCCURS MORE THAN ONCE. DETAILS BELOW.

Target Audience: Math APs, Coaches, Teachers

Integrated Algebra

This is a series of three all-day workshops, where participants will explore the wealth of ancillary materials which accompany the new Integrated Algebra book, including transparencies, graphing calculator resources, class sets of manipulatives, Spanish-language materials, review book, workbooks, assessment options and especially the new online resources, plus ExamView, TeacherExpress, and other technology that is now a part of daily instruction. They will also plan instruction for the next three chapters and practice pedagogical strategies (e.g., Think-Pair-Share, Numbered Heads, Jigsaw) to better reach our students. Breakfast will be included.

3-DAY PD OCCURS ONLY ONCE. DETAILS BELOW.

Target Audience: HS Math Teachers, Math Coaches, Math APs

MATHEMATICS (continued)

Mathematical Problem Solving

This series of two all-day workshops workshop will focus on problem solving, which is the primary standard on all standards lists, (e.g., NCTM Standards and the NYS Learning Standards). There is a critical need for students to improve their problem solving skills, identify specific problem solving strategies, and develop effective techniques for transmitting these strategies to other students. This series is designed to provide an intensive development and reinforcement of problem solving skills to teachers and ultimately to their MS students. Moreover, the model used will be group problem solving, giving participants the opportunity to interact, write, draw, view, react, pose questions, and report methodologies and alternative solutions.

Geometer's Sketchpad–Level 1 Professional Development (Three Days)

Participants will learn how to integrate Sketchpad Version 4 into our uniform curriculum. This will provide the participants with new strategies to assess student understanding; build dynamic, draggable constructions that lead to mathematical insights and conjectures; construct tessellations; and study concepts in algebra. Participants will also investigate trigonometry, the role of proof, conic sections, and other topics while learning how Sketchpad works as a mathematical modeling tool and an exploratory environment for mathematics across the curriculum.

Geometer's Sketchpad–Level 2 Professional Development (Four Days)

Participants will learn about the features of Sketchpad Version 4 that will deepen their experience while building customized toolkits, multi-page Sketchbooks, and dynamic fractals and graphs. Participants will learn advanced methods and begin to master Sketchpad as the tool to explore Euclidean, coordinate, transformational, analytical, and fractal geometry. They will also harness the full power of Sketchpad for algebra, trigonometry, pre-calculus, and calculus classrooms. By the end of day four participants will be ready to conduct Level 1 professional development in their schools.

SCIENCE

Personalized, In House, One-on-One Science Support Services (Half Day)

Receive personalized half-day, one-on-one science support services for grades K-12. This in-house service provides schools the opportunity to tailor support to meet individual school needs. Schools outline the time and nature of the service they will need and the consultant(s) will deliver in-house and on their school's schedule. Services include, but are not limited to, planning for effective professional development, Principal/AP support and development, walk through evaluations and recommendations, instructional support, both informal and formal teacher observations, help with inquiry teams and setting up effective classroom and laboratory environments.

Observing Science Classrooms & Structures to Support Science Instruction

This half-day workshop will be conducted at an elementary school in Queens. Principals will be introduced to rubrics used in science classrooms for observations and rubrics used for science fairs. The Principals will receive and discuss Protocols used for observing a science lesson in the elementary school. They will walk through various classrooms, take notes and engage in discussion groups with the science cluster and classroom teachers. A discussion and examples of "How to Schedule Your School With Enough Science Periods" will take place during the visit. Future visits to other sites can be arranged at the end of the session if Principals feel they would like to visit other sites. Breakfast will be included.

Science Journals

Nature journals can be used in both formal and informal education settings to record observations of the natural world and create opportunities to learn art, science, mathematics, and language arts. Journals used in this way are practically unmatched for enhancing observational and thinking skills at the same time they enhance knowledge and appreciation for local nature. This one-day workshop will get you started keeping nature journals of your own and guide the use of nature journals as tools for teaching and learning. We will consider the importance of journal keeping in the context of scientific inquiry. You will engage in a project based in the process of inquiry. Breakfast will be included.

Using Your Classroom Science Trade Books to Support the Science Curriculum

This one-day workshop session will instruct teachers and supervisors how to use the science trade books that come with the core curriculum. The participants will be taken through an in-depth review of the trade books supporting, enriching and extending the already established curriculum in the schools. This workshop will show you techniques to adapt the science trade books to the already existing curriculum. The workshop is appropriate for schools that have chosen all kit, all text or a blend of text and kit. Participants will receive a copy of "Picture-Perfect Science Lessons" and "More Picture-Perfect Science Lessons." Both of the books are from NSTA Press. Breakfast will be included.

SOCIAL STUDIES

Objects Tell Stories

Teachers will learn strategies for using object-based learning in the classroom, will review major concepts in American history, share best practices and lesson ideas for working with different ability levels. They will work with objects from the Historical Society's touch collection to develop inquiry techniques that will enable students to think and act like historians. Workshop leaders will conduct a tour of over 40,000 items from the N-YHS collection. Teachers will develop their own lesson plans and model activities using items from the collection. All will receive curriculum materials created for the student program Objects Tell Stories.

The Dream of America: Exploring Immigration & Citizenship in US

Who may "become" an American? What has the "dream of America" meant throughout history and to different groups of people? What are the rights and responsibilities of citizenship? Please join us for an interdisciplinary and interactive workshop designed to introduce educators to new resources for teaching immigration in their classrooms. Drawing on Facing History materials and on the experiences of some of the recipients of the Reebok Human Rights Award we will explore these questions and others in this workshop.
