

Sustainability Trainings

We are pleased to announce the dates for our 2016-17 DOE Sustainability Coordinator Trainings. This year the Office of Sustainability is offering four (4) trainings in different boroughs across the city!

Trainings are open to any school-based personnel who are involved in implementing sustainability initiatives at their school (including coordinators, teachers, staff, custodians, green team members, etc.). So put together a team and bring them to a training to learn how you can lead efforts to promote sustainability and affect change, within your school!

Registration is open NOW! [Click here](#)
