

## Using IEP Goals in the Pre-K Classroom

If a child is found eligible to receive preschool special education services, an Individualized Education Program (IEP) is developed. An IEP is about an individual child and how to meet his or her unique needs within the context of an educational environment. An IEP documents a child’s current skills and abilities, determines what special education supports and services will be provided, and establishes educational and developmental goals. The IEP is a tool that ensures that a child with a disability has access to the general education curriculum and is provided the appropriate services and supports needed to progress toward achieving the preschool learning standards while meeting his or her unique needs related to the disability.

### IEP Goals

IEP goals consist of measurable annual goals and short-term instructional objectives. **Measurable annual goals** describe what a child with a disability can reasonably be expected to accomplish within the school year in which the IEP is in effect. There should be a direct relationship between the measurable annual goals on the IEP and the child’s present levels of performance (PLOPs). Annual goals can be academic, address social or behavioral needs, relate to physical needs, or address other needs unique to the child. These goals should be “measurable,” meaning they can be monitored to determine whether the child has achieved the goals. For each annual goal, the IEP must indicate criteria (measure used to determine if the goal has been achieved), method (how progress will be measured), and schedule (when progress will be measured).

**Short-term instructional objectives** are used to determine, at intermediate times during the school year, how well the child is progressing toward achievement of the annual goal. These objectives provide the basis to determine how a child is progressing toward his or her annual goal.

MEASURABLE ANNUAL GOALS			
THE FOLLOWING GOALS ARE RECOMMENDED TO ENABLE THE STUDENT TO BE INVOLVED IN AND PROGRESS IN THE GENERAL EDUCATION CURRICULUM, ADDRESS OTHER EDUCATIONAL NEEDS THAT RESULT FROM THE STUDENT'S DISABILITY, AND PREPARE THE STUDENT TO MEET HIS/HER POSTSECONDARY GOALS.			
ANNUAL GOAL WHAT THE STUDENT WILL BE EXPECTED TO ACHIEVE BY THE END OF THE YEAR IN WHICH THE IEP IS IN EFFECT	CRITERIA MEASURE TO DETERMINE IF GOAL HAS BEEN ACHIEVED	METHOD HOW PROGRESS WILL BE MEASURED	SCHEDULE WHEN PROGRESS WILL BE MEASURED
By June 2016, Tristan will improve his interactions with peers in social situations.	80% accuracy (4 out of 5 opportunities)	Teacher observations (student dictation, photographs, anecdotal notes)	Quarterly
SHORT-TERM INSTRUCTIONAL OBJECTIVES AND/OR BENCHMARKS (INTERMEDIATE STEPS BETWEEN THE STUDENT'S PRESENT LEVEL OF PERFORMANCE AND THE MEASURABLE ANNUAL GOAL):			
Tristan will establish and maintain close proximity with his peers for at least five minutes on 4 out of 5 consecutive opportunities.			
With prompting and support, Tristan will initiate a play activity with peers during child-centered free choice activities for 4 out of 5 opportunities for 3 consecutive days.			
With faded prompts, Tristan will cooperatively play with peers during child-centered free choice activities for at least ten minutes on 4 out of 5 consecutive opportunities.			
With faded prompts, Tristan will be able to maintain a conversation with at least 4 verbal exchanges in 4 out of 5 opportunities.			

### Lesson Planning in the Preschool Classroom

All programs should promote a culture of high expectations for all students. For children with IEPs, lesson planning can support progress towards IEP goals in a natural setting and provide the necessary supports to ensure access to general education curriculum and peers. In a daily lesson plan, teachers can incorporate IEP goals and identify specific strategies to support progress towards goals. Identified strategies should be shared with all adults involved in the implementation of the child's IEP, including teacher's assistants/paraprofessionals, related service providers, and special education itinerant teachers (SEIT). Classroom staff should be informed of their individual responsibilities in implementing strategies within the daily activities throughout the school day.

Here is a sample template that can be used to support the integration of IEP annual goals and short-term objectives within daily activities:

<b>Student Initials:</b>  TP	<b>Activity:</b> Center/Choice Time	<b>Annual Goal:</b> Improve interactions with peers in social situations <b>Short-Term Objective:</b> Establish and maintain close proximity with peers for at least five minutes
	<b>Strategies:</b> Provide prompting to facilitate TP joining a center with other peers Model how to approach other children already engaged in play at centers, e.g., "hi" to peer when entering activity Provide verbal instruction or gesture to signal to move closer to peer	<b>Assessment:</b> <input type="checkbox"/> Photographs <input type="checkbox"/> Observation Notes <input type="checkbox"/> Student Dictation <input type="checkbox"/> Checklist <input type="checkbox"/> Work Samples

Lesson planning should consider the individual needs of the child in relation to his or her disability in order to ensure access to the general education curriculum and standards. Some questions to think about when determining strategies to support the needs of students with disabilities:

- What are the child's needs in relation to the disability?
- When and how does the child struggle to access the general education curriculum?
- Where might this child potentially face challenges within the identified activity?
- What strategies could support the child is reaching short-term objectives and working towards annual goals?

The purpose of the charts below are to provide a list of some possible strategies to implement and consider during lesson planning to meet the individual needs of a student with a disability. The list is not exhaustive and is meant to be used as a guide during planning.

Approaches to Learning: Foundational Skills (Engagement, Creativity and Imagination, Curiosity and Initiative, Persistence)
Minimize transitions
Use visual supports and cues
Use proximity seating
Provide a variety of materials that match children's interests and skill levels
Provide a peer model
Be flexible regarding time for activities (provide additional time as needed)
Be aware of children's sensory preferences
Post schedules and/or student charts at eye level
Provide repeated opportunities to practice skills
Provide clear directions and expectations (repeat as needed)
Simplify task directions
Sequence learning tasks from simple to complex
Eliminate clutter
Reduce distractions, including background noise, as much as possible

<b>Physical Development and Health (Physical Development, Physical Fitness, Health and Well Being, Health and Safety)</b>
Provide developmentally appropriate materials and equipment (magnifiers, wide crayons and markers, rubber writing grips, adjustable writing platforms, large print)
Provide cues as needed to help children improve coordination and control of muscles
Model movements and have children imitate
Model how to hold writing tools, scissors, etc.

<b>Social and Emotional Development (Self Concept and Self Awareness, Self-Regulation, Relationships with Others, Accountability, Adaptability)</b>
Review class expectations and rules frequently
Provide extra structure and support during transitions (visual and verbal cues, individual schedule, songs)
Provide a peer to help model appropriate behaviors
Follow a specific and consistent routine
Alternate quiet and active tasks
Allow for breaks as need (cozy/quiet area)
Model coping strategies to label and deal with feelings
Consider arrangement of environment and placement of materials for easy access to children
Limit distractions (visuals, noise levels, lighting)
Model cooperative play
Provide positive verbal (tone, calm voice) and non-verbal (getting down to child's level, smiling, making eye contact) interactions with children
Provide for calming activities, such as sensory materials or soothing music

<b>Communication, Language and Literacy (Approaches to Communication, English Language Arts and Literacy)</b>
Model conversations with other children
Speak clearly
Read children's favorite stories
Teach letters and words in meaningful ways
Use words and pictures for student charts
Provide a variety of books for children to look at, listen to and talk about
Provide manipulatives to help children re-tell or answer questions from a book
Allow children to demonstrate learning in multiple ways (pointing, singing, visuals, talking, acting out stories)
Model the use of written language
Extend children's responses, e.g., if a child responds with one or two words, repeat his or her response in a sentence
Allow time for children to respond verbally or with movements (gestures, motions)
Describe actions when modeling an activity or skill

<b>Cognition and Knowledge of the World (Mathematics, Science, Social Studies, The Arts and Technology)</b>
Provide explicit explanations for concepts, such as cause and effect
Use visual models
Provide opportunities for children to make choices and discuss consequences of actions
Label events and routines
Positively acknowledge when child tries new things
Connect to child's prior knowledge
Use concrete and manipulative objects
Vary the level of questioning
Use repetition and demonstration of skills
Give only one verbal direction at a time

## Progress Monitoring

Progress monitoring involves ongoing data collection and analysis to ensure progress toward IEP goals. Monitoring of progress can help support learning, inform instructional decisions, and lead to more efficient communication with families and special education related service and/or SEIT providers. Regular progress monitoring also helps to evaluate the effectiveness of a child's special education services.

Some strategies to consider when monitoring student progress include:

- Collect data at regular intervals throughout the school year during daily activities, including play
- Send home daily progress reports with suggested at home activities that support classroom learning and skill development
- Promote day-to-day reciprocal communication with families to involve them as a source of information about the child and to engage them in planning for their child
- Schedule conferences with child's parent
- Set up regular team meetings with the child's SEIT and/or related service providers to discuss strategies and progress toward goals
- Use assessment data and information from meetings/conversations with parents, special education providers, and other classroom staff to refine the planning and implementation of strategies to address the child's needs
- Create graphs and/or charts of student progress

Here is a sample template that can be used to monitor progress toward IEP annual goals and short-term objectives:

<b>Annual Goal:</b> By June 2016, Tristan will improve his interactions with peers in social situations.					
<b>Short-term Instructional Objectives and/or Benchmarks:</b>	<b>Assessment Data, including date, time, observation notes (student dictation, teacher observations), level of support (visual cues, verbal and/or physical prompting, etc.) and progress toward goals</b>				
<i>Tristan will establish and maintain close proximity with his peers for at least five minutes on 4 out of 5 consecutive opportunities.</i>	<b>Date</b>	9/24	10/1		
	<b>Time</b>	9:05 AM	10:15 AM		
	<b>Assessment Data</b>	<i>During free choice activities, Tristan was verbally prompted to enter the block area with another child (CP). He was able to play next to CP for one minute before leaving to play with a puzzle by himself.</i>	<i>During free choice activities, Tristan was visually prompted (using choice chart) to join his peers in dramatic play. Trishia (class para) modeled entering the center area, saying "hi" to 2 other children and sitting to play next to them. She had Tristan repeat what she had modeled. Tristan was able to imitate these actions.</i>
