

# NYC School Survey Report 2008-09

## Scoring Guide

This survey report is for:

SCHOOL LEADERS  
PARENTS  
TEACHERS  
STUDENTS

The NYC School Survey is an important part of the New York City Department of Education’s effort to improve student outcomes and to promote school empowerment and accountability. The NYC School Survey gathers information from parents, teachers, and grade 6-12 students—key school community members who know best how well each school helps students learn.

Survey results will be reported each year to schools at the end of the year. Surveys also factor into the School Environment category of the Progress Report. A more detailed breakdown of results is also reported in school NYC School Survey Reports. The School Report presents response rates and scores for each school, and for schools of the same school type. In addition, the Survey Report presents results by question for each school.

Section 1 of this guide explains survey scoring. Section 2 answers Frequently Asked Questions. Section 3 includes point values for each survey question.

## Section 1: SURVEY SCORING

Each school receives four overall scores for the four categories of the survey: Academic Expectations, Communication, Engagement and Safety and Respect. Calculating these school-level category scores begins with the responses of parents, teachers and/or students at a school.

**Question scores** are determined based on the answers to survey questions that respondents selected. Each answer choice is awarded a point value between 0 and 10. The answer choice that reflects most favorably on a school’s learning environment is awarded 10 points. The answer choice that reflects least favorably on a school’s learning environment is awarded 0 points. The intermediate answer choices are awarded point values between 0 and 10. Each question score is the average point value of the answer choices of all respondents to that question. Detailed information about point values awarded to each answer choice is in Section 4 of this guide.

**Domain scores** are determined based on question scores. A domain score is calculated for each respondent group (parents, teachers, or students) by averaging the question scores in that domain. Then, the domain scores for each of the respondent groups are combined to form overall domain scores.

Within overall domain scores, respondent group domain scores are weighted equally, except in cases in which the response rate of one or more respondent groups is substantially below the Scoring Model average response rate for the group. In such cases, the group receiving the low response rate is given half the weight of the other groups.

For schools with three respondent groups (parents, teachers and grade 6-12 students) surveyed, the weighting possibilities are outlined below:

	All groups reach minimum	One group does not reach minimum	Two groups do not reach minimum	All groups do not reach minimum
Group 1	33.3%	20%	25%	33.3%
Group 2	33.3%	40%	25%	33.3%
Group 3	33.3%	40%	50%	33.3%

For schools with two respondent groups surveyed (parents and teachers), weighting possibilities are outlined below:

	All groups reach minimum	One group does not reach minimum	All groups do not reach minimum
Group 1	50%	33.3%	50%
Group 2	50%	66.7%	50%

In cases in which no survey responses were received from a respondent group, final domain scores are adjusted to allow fair comparisons to schools that have complete survey data. Because New York City parents, on average, rate schools more positively than teachers or students do, the scores for schools with no teacher or student responses (grade 6-12 students only) are reduced to assure that the school's score is not inappropriately inflated by the presence of parent responses and the absence of other responses.

For schools receiving no surveys from teachers or students, adjustments are outlined as follows:

If a school should have received survey data from:	But only received survey data from:	Adjustment to domain score
Students, Teachers, Parents	Parents	-0.60
Teachers, Parents	Parents	-0.45
Students, Teachers, Parents	Students, Parents	-0.15
Students, Teachers, Parents	Teachers, Parents	-0.15
What if they don't receive parents?		

Combined scores for each of the four domains (Academic Expectations, Communication, Engagement, and Safety and Respect) are included on the Progress Report and factor into each school's grade. Domain scores by respondent group, question scores, and percentage of respondents selecting each answer choice are reported separately on the Survey Report. Progress Reports (once they are distributed in late September and October) and Survey Reports are available at each school's website.

**On certain questions, "Does Not Apply" or "Don't Know" answer choices exist. To calculate these scores, you should not treat these as zero (having no point values) when calculating scores.** Survey reports include percentage distribution across all possible answers, including the percentage of respondents who chose "Does Not Apply" or "Don't Know." However, on certain Parent, Teacher and Student questions "Does Not Apply" and "Don't Know" do *not* factor into the calculation of the question score. They are marked as "No Score". This does NOT mean that to calculate the score for questions that one must simply subtract the "Does Not Apply" responses.

For the questions described above, where a "Does Not Apply" or "Don't Know" response is marked "No Score", each school's score is based on the responses excluding the "Does Not Apply" or "Don't Know" response. To calculate your score for these questions, you must rescale the percentages of the contributing answers by dividing each percent by 100 minus the percent listed for "Does Not Apply" or "Don't Know."

**EXAMPLE**

Take, for example, a school that has 10 responses to a question with options: Strongly Agree, Agree, Disagree, Strongly Disagree and Does Not Apply. Two respondents selected each response. According to the key listed, questions should be given the values shown below:

Strongly Agree	Agree	Disagree	Strongly Disagree	Does Not Apply
10 points	6.7 points	3.3 points	0 points	"No Score"
20%	20%	20%	20%	20%

You must subtract the % of parents who responded "Does Not Apply" from 100%. In this case, this will result in 80%. Then, you must divide each percentage value for the other answer option (all 20%) by the new denominator (80%). This means

each value is 25% whereas before they'd only been 20%. The school's score for this question would be 5 points, calculated as shown below:

$$10 \text{ points} * 25\% \text{ of responses} + 6.7 \text{ points} * 25\% \text{ of responses} + 3.3 \text{ points} * 25\% \text{ of responses} + 0 \text{ points} * 25\% \text{ of responses} =$$
$$10 * .25 + 6.7 * .25 + 3.3 * .25 + 0 * .25 =$$
$$2.5 + 1.675 + .825 + 0 = 5$$

## 2. FREQUENTLY ASKED QUESTIONS

### **Are schools penalized for low response rates?**

No school is penalized for low response rates in Progress Report grades. All surveys submitted were counted, all are included in Survey Reports, and all have an impact on Progress Reports grades.

In cases in which the response rate from one group (parents, teachers, or students) is substantially below the Scoring Model average for that group, the responses from the group are weighted less than the responses of other groups in survey scores (weighting adjustments are summarized in Section 1, Survey Scoring, above). In cases in which 0 surveys were received from teachers or students, a score adjustment is made to allow fair comparisons between the constituencies that did respond. These adjustments are rare, affecting a very small number of schools.

### **How are response rates calculated?**

The response rate is the number of surveys submitted divided by the number of people in the survey population. The student survey population is all students in the school who are in grades 6 through 12. The parent survey population is all parents of students in the school. Parents with more than one child in the same school are counted only once in the parent survey population. Parents with children in more than one school are counted once in each of those schools, because they are invited to fill out a survey for each school. *(erase paragraph break?)*The teacher survey population is all full time teachers and guidance counselors in the school. Survey populations are based on school registers in Automate the Schools (ATS) and teacher lists in payroll databases.

### **My school received surveys for substitute teachers or teachers on extended leave who were no longer in my school at the time of survey administration. Are these teachers included in my response rate?**

The teacher survey population does not include substitute teachers. The teacher survey population does include teachers on extended leave if they were on your school's payroll list as of December and as of May of that school year.

### **The survey asked parents with more than one child in the same school to complete just one survey for that school. Does the response rate reflect that?**

Parents with more than one child in the same school, as determined by the data contained in ATS, are counted only once in the parent survey population. The response rate reflects the parent survey instruction to complete one survey per school.

### **When I divide the number of student surveys submitted by the enrollment listed on the Survey Report, the result does not equal my student response rate. Why?**

The student survey population is based on the number of 6 through 12 grade students in the school as listed in ATS as of December and May of that school year. The student enrollment listed on the Survey Report is based on the total number of students in the October 31 Audited Register. In many cases, these numbers are different as a result of student mobility.

### **Some survey questions do not evaluate my school. For example, parent surveys ask "What are the BEST ways for your child's school or teachers to get information to you about your child's education?" And teacher surveys ask "How long have you been a teacher at this school?" Are these questions counted on the Progress Report?**

Survey questions that do not evaluate schools are not counted on the survey report. These demographic questions and questions about preferences are marked "NS" (not scored) on the Survey Report.

### **Are point values evenly distributed among answer choices?**

Not always. On all scored questions, the point value of the answer choice that reflects most favorably on a school's learning environment is 10, and the point value of answer choice that reflects least favorably on a school's learning environment is 0. On most scored questions, the point values of the intermediate answer choices are evenly distributed between 0 and 10. On some questions, however, several answer choices are assigned equal point values, or the point value for the question may be based on the combination of respondents' answer choices.

Detailed information about point values for each question is available in Section 4 of this guide.

### **Some survey questions specify that they are for high school respondents only. My school is not a high school, but my Survey Report indicates responses for this question. Why?**

Survey Reports include all survey respondents' answer choices. If parents, teachers, or students not in high schools answered questions that were directed towards high schools, these responses are reported. However, these questions are not scored.

### **The sum of percentages of respondents to each answer choices to one survey question does not equal 100%. Why?**

Percentages are rounded to the second decimal place. In some cases, due to rounding, the sum of percentages of respondents selecting each answer choice to one survey question may not equal exactly 100%.

### **How are Scoring Model average scores and response rates calculated?**

Scoring Model average scores and response rates are calculated by school type. School types included in each school type's Scoring Model average are summarized in the table below. ????

<b>School Type</b>	<b>School Types included in Scoring Model average</b>
Early Childhood School	K-3
Elementary School	K-6
Elementary / Middle School	K-8
Elementary / Middle / High School	K-6, K-8, K-12, 6-8, 6-12, 9-12
Middle School	K-12, 6-8, 6-12
Middle / High School	6-8, 6-12, 9-12
High School	K-12, 6-12, 9-12
Transfer School	9-12 (Transfer Schools only)

### **How are blank responses treated on the Survey Report?**

To calculate scores for each question on the Survey Report, the percentage of respondents selecting each answer choice is calculated by dividing the number of respondents selecting each choice by the total number of respondents who answered the question. Respondents who left the question blank are not included in the percentages reported per survey question.

### **How are multiple responses treated on the Survey Report?**

Answer choices of respondents who selected multiple answer choices to questions that did not indicate "check all that apply" are not reported on the Survey Report, and are not included in scoring.

## **3. SCORING MODEL**

This report provides the point values for all parent, teacher and student questions asked on the 2009 NYC School Survey. This model can be used as a partner with your school's Question-By-Question Survey Report.

Parent responses are listed first followed by student and teacher responses. Questions are assigned to and sorted by four categories: Academic Expectations, Communication, Engagement and Safety and Respect.

All numbers below are point values. The most common question scores are between 0 and 10, and the highest possible score is 10. A school's score would be found in parentheses after each question.

**Who took the Survey at your school?**

*City Average*

	<b>Parents</b>	45%
	<b>Students</b>	80%
	<b>Teachers</b>	73%

**P Academic Expectations:** *Parents feel the school encourages students to do their best by developing rigorous and meaningful academic goals.*
