81 8th Ave., New York, NY

Aviation is an exciting field where pilots, engineers, mechanics, and other STEM professions support air travel throughout the US. Get a behind the scenes tour of JFK and learn how air traffic controllers, engineers, and other FAA employees use technology to maintain the safety and integrity of the country's civil airspace.

* In order to tour JFK, visitors must be US citizens. Students should bring a driver's license, passport, or a copy of their birth certificate. The session will go from 9:30 AM -12:30 PM, therefore students who participate in this session will not be able to go to other sites.

* Should the partial government shutdown continue through the end of October, the FAA may unfortunately have to cancel its participation in STEM Matters NYC Career Day and will communicate with the organizers of the event as soon as possible if that happens.

Meet at Howard Beach AirTrain Station, 159th Avenue & 103rd Street, Howard Beach, Queens, NY

Good Housekeeping Research Institute

Founded in 1900, the Good Housekeeping Research Institute is a consumer product testing laboratory for Good Housekeeping magazine that is staffed by chemists, engineers, nutritionists, home economists, chefs and other scientists. Evaluating products from mascaras to microwaves, digital cameras to rainwear, the Research Institute is composed of six labs—focusing on beauty, textiles, kitchen equipment, home appliances, cleaning products, consumer electronics, and nutrition—as well as Good Housekeeping's test kitchen. Get a behind the scenes tour of how these STEM professionals evaluate the claims made by the products you use on a regular basis.

300 W. 57th Street, Manhattan, NY

Honeybee Robotics is an engineering R&D company that develops advanced robotic systems. The company creates systems for space exploration -- including the last 3 generations of NASA's Mars landers -- as well as satellite mechanisms, surgical platforms, mining systems, and other advanced applications of robotics that extend capabilities beyond what is currently possible. Come learn how their engineers are developing technology and instruments for robotic and spacecraft systems that operate in dynamic, and often hostile environments, both in space and on Earth.

460 W. 34th St., New York, NY

Murray's Cheese is not just New York City's oldest cheese shop, dedicated to bringing delicious cheeses, charcuterie, and artisanal accoutrements to their customers. They also have subterranean cheese caves where they ripen cheese from around the world. Come learn about how their cheese cave manager uses culinary science for aging cheese and keeping food safe, and how their buyer applies math on a daily basis to help source their cheese from around the world.
