## Reading Intervention

The award-winning Earobics® Foundations and Connections software provides individualized instruction in critical areas of reading. As students interact with lively characters like Katy-Pillar and Hakeem Hippo, they develop the foundational literacy skills essential to their reading success.

There are hundreds of levels of instruction specifically designed to help students build critical literacy skills, including recognizing and blending sounds, rhyming, and discriminating sounds within words.

Earobics software builds on the strength of each learner, automatically adjusting to each student's individual skill level, while enabling students to reach their full potential. The software also provides specialized support for English Language Learners with instructions in ten languages. Each click of the mouse is recorded and stored in easy-to-read reports, allowing educators to drive instruction based on data.

### Earobics offers an innovative approach to literacy success.

- Employs adaptive technology that delivers systematic, explicit and individualized instruction
- Automatically adjusts instruction to ensure students are working at the appropriate level
- Easy-to-read reports allow educators and administrators to quickly monitor progress and prescribe intervention
- Aligns with assessments like DIBELs and ECLAS
- Phonological awareness instruction covers blending, rhyming, segmenting, sound identification and sound discrimination
- Meets the requirements of many grant and funding sources
- Customized professional development
- Meets the needs of diverse student populations
