

Access COR Advantage Training Modules 1 – 5!

The modules below will be presented over five consecutive weeks in a facilitated online course. Participants will spend about three hours per week on course work, including time in the classroom collecting anecdotes. All classes will be facilitated by high-level, experienced early childhood professionals who have passed certification in both the HighScope Preschool Curriculum and COR Advantage.

Once registered, you will receive an email with log-in instructions as available.

Training Overview:

Module One: This module provides an overview of authentic assessment, a review of writing objective anecdotes, hints and tips for collecting anecdotes throughout the classroom day, and detailed information on COR Advantage assessment categories.

Module Two: Participants will learn the process for using COR Advantage, and will develop their understanding of the developmental range of scoring levels and how to score anecdotes. The module will feature in-depth work on COR Advantage items and levels in the areas of Approaches to Learning; Social and Emotional Development; Physical Development and Health; and Language, Literacy, and Communication.

Module Three: Participants will continue to work with scoring and developmental levels. This module will provide comprehensive work with the items and developmental levels in the areas of Mathematics; Creative Arts; Science and Technology; and English Language Learning.

Module Four: This module will provide information on the COR Advantage Developmental Summary. Participants will learn four ideas for filling in missing data to ensure complete results. They will also learn how to share information with families by using the family report Your Child's Developmental Profile.

Module Five (optional): We strongly recommend participants take the optional Inter-Rater Reliability Test which is offered in Module Five. To use COR Advantage as a valid and reliable assessment instrument, teachers should be certified in the use of the tool. For certification, users are required to pass the reliability assessment that accompanies the training at a score of 80% or above. You can access this self-paced module *any time, at your own convenience*.
