The Science And Medicine Middle School (18K366)

Framework for Great Schools

Research shows that schools strong in the six areas are far more likely to improve student learning.

KEY:

School Overview

The Science and Medicine Middle School 366 uses health and medicine as a lens through which students learn core academic subjects, including mathematics, science, social studies, and English Language Arts. SMMS equips young people with the knowledge and skills to manage their own health and well-being, advocate for community members, and pursue post high school education that may prepare them for careers related to health and wellness. We believe that students can and should shape their health, education, professional futures, communities, and their nation. To that end, SMMS uses a student-centered approach to learning that highlights student voice and engagement as priorities throughout our school. Through our partnerships with universities, hospitals, and other medical facilities, we are enabling our students to travel on their life's path to high school, post-secondary education, and careers. ...
