School Overview

The International High School for Health Sciences offers limited-English speaking students who are new to the country an opportunity to develop skills necessary to pursue college and careers in medicine. Classes focus learning on reading, writing, and communicating fluently in English while also providing opportunities to maintain students' native languages. We use real-world learning by giving our students experiences in local healthcare settings before they graduate. Students gain practical skills including CPR and first aid, explore careers through eleventh grade internships at local medical centers, and take early college coursework with our university partners. These hands-on opportunities both provide a context for language acquisition and allow students to use their native language as an asset in their service to the community.
