ANNUAL ARTS IN SCHOOLS REPORT 2010-2011

This Annual Arts in Schools Report provides data for:

School: 04M435

2010-2011 Principal: Jose David Jimenez

Arts Education Liaison: Brian Bradley

INSIDE THIS REPORT

The Annual Arts in Schools Report is a tool for school leaders to understand their delivery of arts education to every child in their school. Each Annual Arts in Schools Report is based upon responses submitted by schools and provides valuable information about two areas:

Student Access to and Participation in Arts Education

Uses survey information to understand if students are meeting the New York State Instructional Requirements for the Arts as well as the experiences, resources and facilities used to support arts learning in each school. In addition, this section reports on questions asked in the School Survey about arts education.

Resources to Support Arts Education

Uses survey information to understand the resources that schools are allocating for arts education. This section includes information on certified arts teachers, arts and cultural organization services, space for arts learning, arts fundraising and professional development opportunities for teachers.

Dear School Community,

This report provides a view of the arts education opportunities you are providing for your students based on your responses to the Annual Arts Education Survey in May 2011 and includes information from the New York City Department of Education's databases.

The Annual Arts in Schools Report is an important part of the New York City Department of Education's effort to ensure that schools are providing students with the high-quality arts education they need and deserve. The report has been created to help school leaders, parents, and teachers understand how they can improve student learning in the arts, building on the Blueprint for Teaching and Learning in the Arts which provides detailed PreK-12 curricula aligned with State standards:

New York State Requirements for Arts Education

At the elementary level, in grades 1-6, the New York State Education Department (NYSED) requires that students receive instruction in dance, music, theater and visual arts in every grade. In addition, NYSED recommends that students spend a specific allocation of hours learning in the arts.ⁱ

At the middle school level, in grades 7 and 8, the NYSED expects that students achieve, by the end of grade 8, one half-unit of study in visual arts and one half-unit of study in music. NYSED has allowed schools to offer any two of the art forms to meet the requirements.

At the high school level, the New York State Education Department requires that all students graduate having taken one unit or two credits in the arts (dance, music, theater and/or visual arts). High schools have the option of offering a three or five year sequence in any one of the four art forms. Students who complete five units in a single art form and successfully complete the exit exam in that art form are eligible to receive a Regents Endorsed Diploma with advanced designation in the arts.

Description of School's Arts Programs

This school has submitted the following description of its arts program:

Manhattan Center for Science and Mathematics High School offers a robust arts curriculum. We offer both visual arts and music, including an introduction to music theory. Additionally, we offer both Technical Drawing and Photography. The visual art program explores arts through the ages. It explores artistic techniques for drawing, painting, sculpting, etc. and we offer many opportunities for students to create their own art. In our Introduction to Contemporary Music, students examine music from the Baroque Period to the present. Our Technical Drawing program introduces students to composing plans that visually communicate how something functions or is to be constructed. Our photography program is instructed by a former professional photographer who is passionate about developing the artistic eye in each of his students. Each year, student photographs are exhibited throughout the school as a celebration of their achievements. Although we are primarily a science and math high school, we believe that the arts are important in the cultivation of well-rounded students.

Notes

- The Annual Arts in Schools Report is based upon self-reported data submitted by schools
- Throughout this report, N/A signifies that data does not apply or was not available.
- Throughout this report, a blank field represents “none” or no data provided.
- School Survey data are based on responses from schools where students provided responses to the 2010-2011 School Survey and are based on the perception of students about the arts in this school. For more information on how well this school supports student learning in the arts, please visit the 2010-2011 School Survey which is located on the Statistics section of this school’s website.
- All data are based on arts instruction offered during the school day. This Annual Arts in Schools Report does not report on after school, weekend, and summer arts education.
- Percentages of the School Survey data may not add up to 100 percent due to rounding. The percentages are not based on a student response rate of 100%.

Definitions

- For District 75, Standard assessment students are students who participate in city-wide testing. Alternate assessment students do not participate in city-wide testing.
- For a detailed description of what an appropriately equipped arts classroom is, please refer to the Blueprint for Teaching and Learning in the Arts, <http://schools.nyc.gov/offices/teachlearn/arts/blueprint.html>.
- A blackbox theater is a simple, unadorned performance space, usually a large square room with black walls and a flat floor.
- General or core music is a broad-based study of music including music making, literacy, connections to world cultures, community resources and careers and life-long learning.
- “Pull-out” programs refer to those school day instructional activities that are scheduled for groupings of students across a grade or grades and not by official class.
