

Cooking is fun!

Before you cook you should decide what

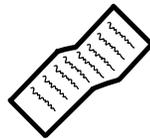

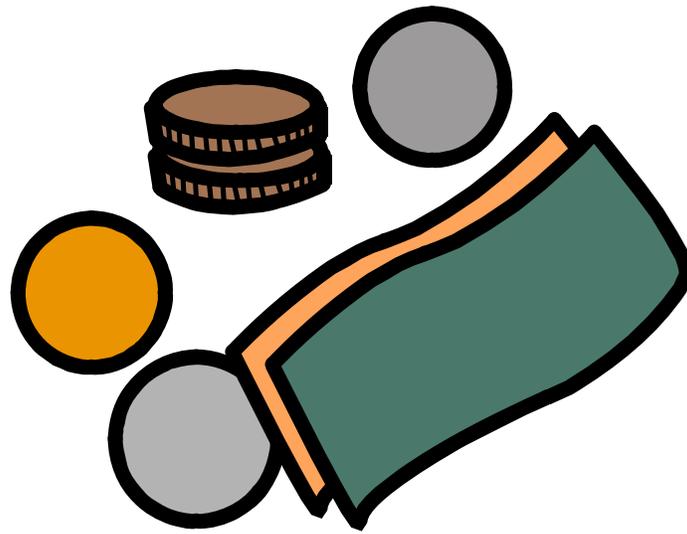

you want to eat.

After you choose you should make a list

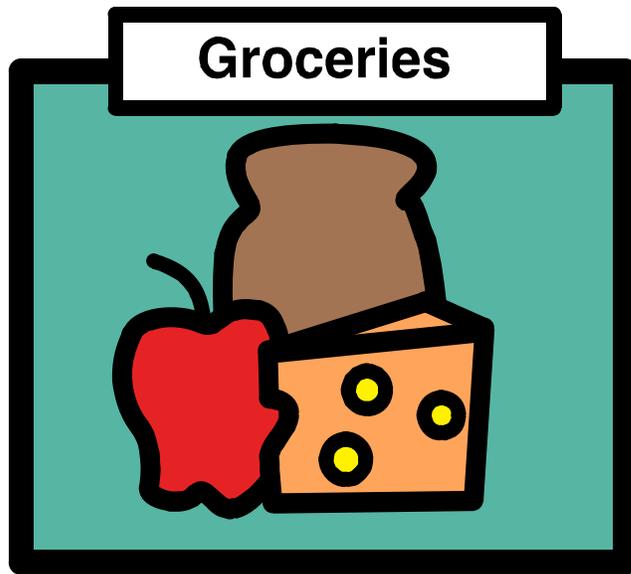

of ingredients.

After you make your list you need to

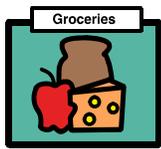

know how much your ingredients will cost.

After you have your money, you need to

go to the grocery store.

At the grocery store you need to shop for

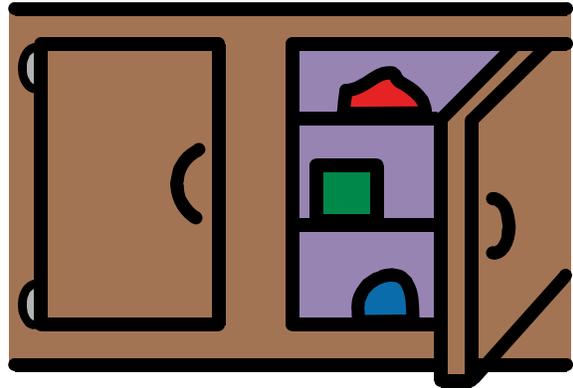

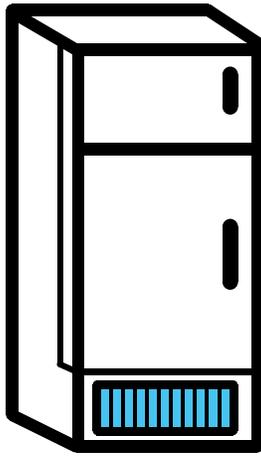

your ingredients.

After  you  shop for your ingredients  you

 ↓ need to  buy them.

When you bring your items home you

need to put them in the refrigerator or

the cupboard.

NOW,

you

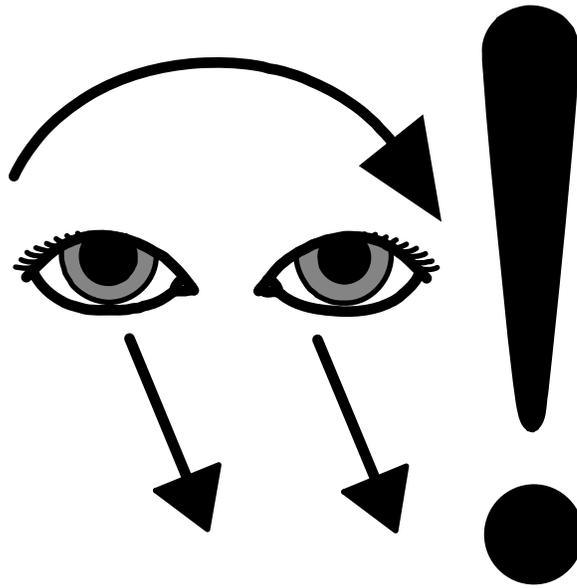

are

ready

to cook!

When

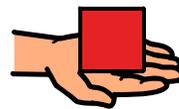

you

cook

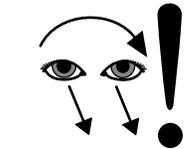

you

have

to

be

careful.

When

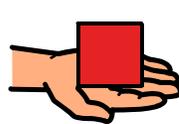

you

cook

you

have

to

be

clean.

Before

you

cook

you

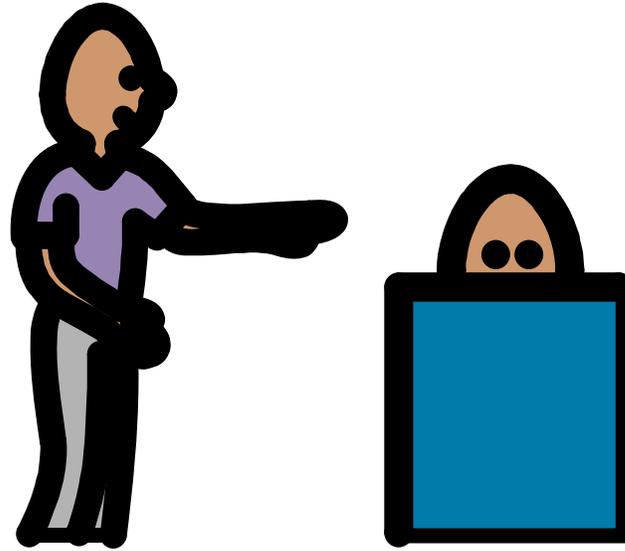

must

wash

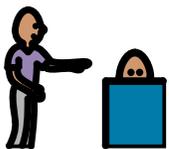

your

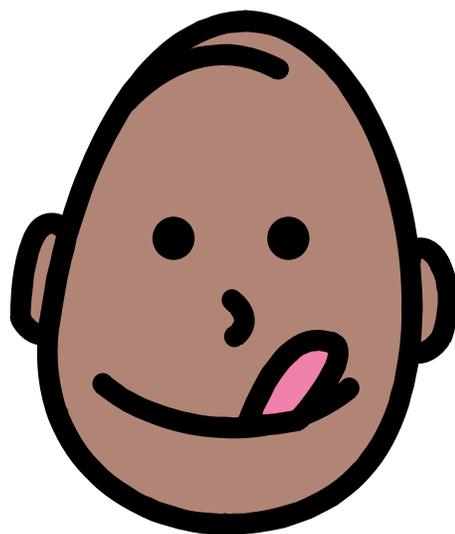

hands.

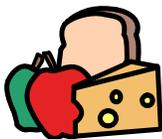

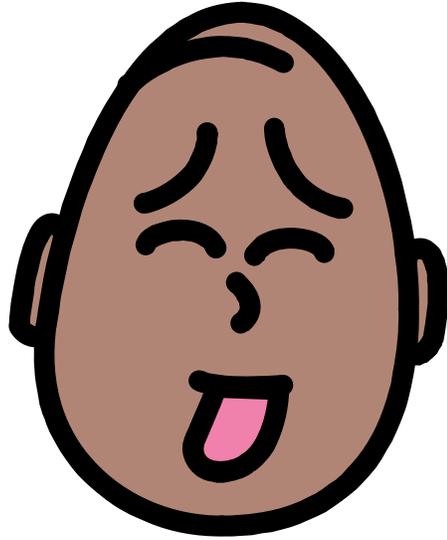

Once your hands are clean you need to

find your ingredients.

Which foods do you think are yummy?

Which foods do you think are yucky?
