

Marilyn Burns/Math Solution
Integrating Mathematics and Language Arts in K-8 Classes Through Literature, Questioning, and Writing.

Marilyn Burns/Math Solution presented a five Part Institute focusing on integrating mathematics and language arts. Each session highlighted a different topic such as: Communication in the Math Class, Good Questions for Math Teaching, Writing in the Math Class, Math and Nonfiction, and Math and Literature. The expectation of application for participants was to structure individual and cooperative writing assignments that help students clarify their understanding of mathematics. Participants will be able to incorporate into classrooms instruction different types of writing assignments to promote thinking, reasoning, and problem-solving.
