## What's in Release 2.6.4

Release 2.6.4 includes the following updates and enhancements for MyGalaxy and Galaxy 2000.

### **MyGalaxy**

#### Automatic Approvals

A new function has been added to Galaxy that will automatically approve certain items when saved. The Budget Office will have the ability to make specific allocation categories available for auto-approval. If an item using one of these ACs is saved it will automatically be approved and will appear as red on the TO. If an item is split funded - all ACs funding the item must be available for auto approval in order for the item to be auto approved.

This functionality is similar to the current Hold Harmless automatic approval function but different in that it uses different criteria. This function ***will not*** work for users who have "Update" access only.

**Please Note:** An item cannot be Auto Approved if it requires an Exception Authorization. The Automatic Approval must pass Fund Control in order to be approved.

**Galaxy 2000**

**ROC Transfer History Screen**

A ROC Transfer History screen has been created that allows ROC users to view the history of all ROC transfers for a particular Allocation Category.

The number of records can be filtered by using additional search criteria such as ROC, District, School, Reason and/or a date parameter.

The screenshot shows a web application interface with a navigation menu. The menu items are: Allocation Category Detail, Allocation Category Filter Rule(s), RAE, District Summary, District School AC Summary, Fringe Exclusion, Tlump Import Utility, Tlump Import Log History, ROC Transfer Utility, ROC Transfer History (highlighted with a red circle), Allocation Instructions Maintenance, and Allocation Change Instruction. A callout bubble points to 'ROC Transfer History' with the text 'Select ROC Transfer History from the Allocation drop down Menu'. Another callout bubble points to the 'Go' button at the bottom of the form with the text 'Select criteria and click "Go"'. Below the menu is a form titled 'ROC Transfer History' with fields for AC (ROC PS), ROC (96K699), District, School, Reason, and Since, followed by a 'select' button and a 'Go' button.
