

Galaxy Release Notes
Release 2.5.79

What's in Release 2.5.79?

Release 2.5.79 includes the following updates and enhancements:

myGalaxy

Comments

Required comments can no longer be deleted (comments are *required* if an item funded with Reimbursable Funds is being edited). Optional comments may still be deleted. Also, only one comment is required for the edit of an item with reimbursable funds. If the in process item is edited again, a new comment is not required (although it is optional).

Galaxy 2000

ROC Transfer Utility

Allocation reductions are now allowed in the ROC Transfer Utility even when the amount allocated is greater than the control amount.

Allocation Category

The Allocation Category names in the ROC Transfer Utility are now sorted alphabetically.

Report Profile

A pop-up message has been added to Report Profiles function regarding leveled fields (all *blue* attributes in Report Profiles are leveled fields). Level fields *purposely* do not print when exporting to Excel if item level attributes are selected (Activity Code for instance). The following message will now appear as a reminder when exporting to Excel using a report with Leveled fields *and* Item level attributes:

“The following fields from your report will not appear when exporting to Excel.

[field 1]

[field n]

These are 'leveled fields' that only appear at the summary level and do not pertain to the item level details of your report. 'Leveled fields' will only appear in an Excel export if your report only contains summary fields.”

Comments

Comments added in the ROC Transfer Utility are now printing from the Transaction Ledger.
