Release 2.5.81

What's in Release 2.5.81?

Release 2.5.81 includes the following updates and enhancements:

myGalaxy

Supervisor Titles

All Supervisor Titles will now be automatically re-calculated after every salary adjustment. Currently, salaries are not re-calculated once the item is staffed.

Also, Supervisory vacancies will now *always* cost at the default rate regardless of whether there is intended information on the vacancy or not.

Hold Harmless

The Hold Harmless functionality is being modified. Hold Harmless accruals will now take effect at the same time the Hold Harmless item is funded by the ROC. Previously the money funding an item would become available immediately after making the item HH. Now, the original funding will remain with the Hold Harmless item until it is approved by the ROC. Therefore AC Totals, Funding Recommendations, and Fund Control will show amounts differently when Hold Harmless items are involved.

This is how the funding use to look just after an item was removed.
